THE "NEW MODEL" ROTARY DISC JOINTED PULVERIZING HARROW.

MANUFACTURED BY
J. F. MILLAR & SON, MORRISBURG, ONT.
Effective in work, simple in construction, durable in wear, convenient in handling. Progressive farmers say that it is the *very best farm implement* ever produced.

The "New Model" Disc Harrow can be set up without hammer or wrench; can be taken apart in 30 seconds, without hammer or wrench; can be loaded into a wagon by one man; its scrapers clean perfectly in any soil; its lever changes the angle of the gangs easier than any other; its scrapers are automatic in their operation; its journals have no end friction nor end wear; its scrapers operate independently of each other; its draft is not carried on the neck-yoke; its scrapers are self-sharpening by wear; its gangs are flexible, and they run level; its scrapers clean the disc without attention from the driver; its draft is lighter than any other harrow doing the same work; its axles are square, and provided with lock nuts and lock washers; less freight less handling, less wear, and less trouble.
We also manufacture the "Warrior Mower," Steel Plows, &c. Write for circulars and prices. Agents wanted where we have none. 255-c

HALL'S IMPROVED HAY CARRIER AND FORK.—This engraving represents my New Reversing Carrier. By pulling down on draft rope it can be changed in a few minutes to pitch hay into opposite mow. It is made from best refined Malleable Iron and Steel, and guaranteed to give satisfaction if properly erected. Hundreds are in operation in all parts of the Dominion, and are giving universal satisfaction. I also make a Carrier for wood track, which is as good, if not better, than any in the market. It is also made from Malleable Iron, and warranted to give satisfaction; can be changed by simply changing end pulley. This is easily accomplished by using my Patent Pulley Hoister. The pulley can be placed in position in peak of barn without climbing, also lowered again, saving all the trouble of going aloft to change pulleys and carrier, one set of pulleys being sufficient; no pulling of rope or changing ends, always using one end to draw by. This is a new feature in Hay Carriers. The Common Sense Sheaf Lifter can be furnished if required.
Liberal discounts to good agents—no others need apply, as we will not deal with any but good, responsible men. Send for circulars and prices.
Address—**THOS. HALL,**
IROQUOIS, ONT. 255-d
