

# Equipment Bags

Tough, lightweight nylon bags in every size and shape—  
There's one just right for your game!

All of Mountain Gear's sports bags are made of 420 denier high-density nylon, sewn with three-ply nylon thread, a combination which makes for great strength and light weight. The inside surface of the fabric is coated for water resistance. This year, we're taping the seams with an approved twill tape. It still waterproofs the seam, but it's even stronger than previous versions. We've also included two new models—a backpack and a gym bag. All are available in red, royal or black with green trim, and silver with blue trim.

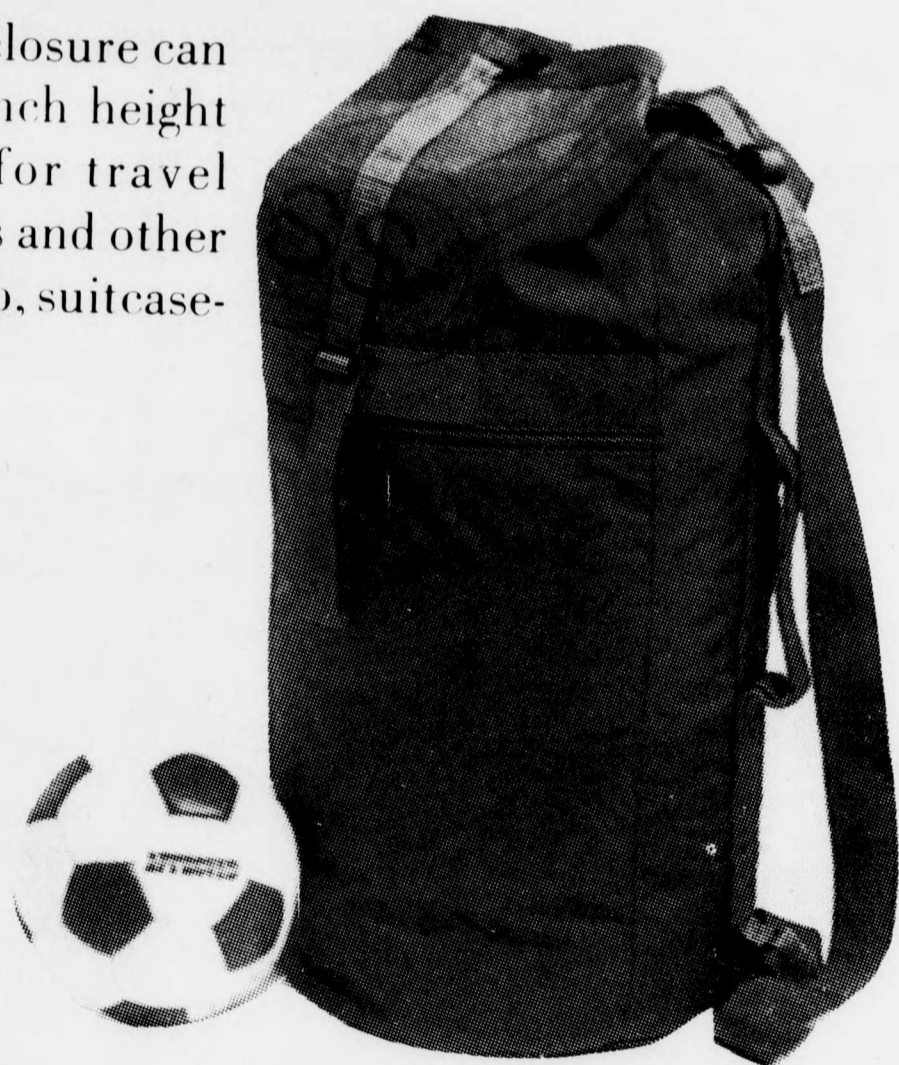

## Duffle Bag

Authentic, military style 'grommet and u-bolt' closure can be locked for security. 13 inch diameter, 31 inch height takes lots of gear. Outside zipped pocket for travel documents. Small inside pocket keeps your keys and other small valuables from going astray. Shoulder strap, suitcase-style handle and grab strap.
