

## A DEFINITION

# DeLAVAL

From  
G. DeLaval  
Inventor

The best known and most efficient Cream Separator manufactured. 600,000 have been made and sold, many times all others combined. Winner of every highest award at every World's Exposition in twenty-five years. Unequalled in any respect. Indispensable to a Dairyman."

THE DeLAVAL SEPARATOR CO.

77 York Street

WINNIPEG

TORONTO

MONTREAL

## Frost Lock

So simple, it makes you wonder why it wasn't invented a hundred years ago. So great, it makes the "Frost" the best wire fence in the world.

Frost Wedge Lock LOCKS running and upright wires together. Does not bend, knot, crimp or kink them. Simply locks them so they can't sag, bend, rub or hang. It's the only device yet invented that locks two hard wires without injury to either. Galvanized to prevent rust.

A wire fence that is put together with small, soft tie wires is just as strong as those soft wires, and no stronger. A lock that needs a crimp or bend to make it hold, weakens the whole fence. When the horses or cows get to cutting up, and ram into the fence, those weak spots snap like a bursted bubble.

## Frost Wire Fence

is high carbon coiled spring steel wire, and every strand is capable of bearing 2,000 pounds weight. Uprights are large and strong, and the Frost Lock holds uprights and running wires into one compact whole that even Texas steers can't break down.

Write for catalogue. It's free.

FROST WIRE FENCE CO. Limited

WINN. PEG., HAMILTON, CLEVELAND,  
Man., Ont. Ohio

### WIDE TIRE IRON WHEELS FOR WAGONS

Made any height, any width of tire, and to fit any axle. Just the thing for the farm, are stronger, lighter and cheaper than wooden wheels.

Our **QUEEN CITY HANDY WAGON**, with Iron Wheels and wide Tires, is low and convenient for farm and general work. Made by skilled workmen, and of the best material. Guaranteed to carry five thousand pounds. Write for catalogue with full description of both wheels and wagons.

Dominion Wrought Iron Wheel Co., Ltd., Orillia, Ont.

### Cocoa-Nut Oil in Butter

In a police court in England a few weeks ago two parties were tried for selling what the analyst described as "the nearest copy of butter yet produced." What they sold as butter was a mixture with 2 per cent. foreign fat, 10 per cent. of which was cocoanut oil. One analyst stated that a few months ago he should probably have passed the sample as genuine butter. The introduction of cocoanut oil into margarine is a new process.
