MAPLE LEAF HOLSTEINS

When looking for Holstein Cattle plan on making a visit to Maple Leaf Stock Farm. Can show you over 300 head in few hours time. The place to buy if you want one or a car load. Drop a card when you are coming to

GORDON H. MANHARD — — **MANHARD, ONT.**
Clark's Station, C. P. R. Brockville, G. T. R.

The Superior the only station that you can adjust to tie from your smallest calf to your largest export steer.

MARKET REVIEW AND FORECAST

Toronto, Monday, July 22.—Weather conditions in Western Canada are most favorable to a bumper wheat crop. Just at the time when rain was most needed, as the wheat was starting to head, almost the whole wheat growing area was visited by heavy showers of rain. As the acreage is considerably in advance of last year, a record crop is expected.

The question that is now agitating the minds of Western grain growers is, where will we market this wheat and how will we market it? The Grain-Growers' Grain Company have decided to lease the system of elevators owned by the Manitoba Government and also a large terminal elevator at Fort William, but even with these added facilities for handling the grain crop of the continent a repetition of conditions this year is feared next season. The bitterness of Western farmers at the loss of the natural market in the United States was evidenced in the results of the recent election in Saskatchewan, where the people repudiated reciprocity as an economic necessity. In Ontario at the present time, crop prospects are favorable. The long drought has broken by showers and spring grains have improved greatly. With such favorable crop prospects trade in all lines, as might be expected, is good.

WHEAT

The wheat market is steady. The prospects for a record crop in Western Canada caused some uneasiness on the United States markets, but short supplies in Canada held prices steady at last week's level. Ontario millers report an excellent foreign demand for grain. Quotations are as follows: No. 1 Northern, \$1.12; No. 2, \$1.09-1.12; No. 3, \$1.06-1.12; feed wheat, 65c to 66c; Ontario No. 2, \$1.05 to \$1.06.

COARSE GRAINS

With grain ripening in the fields of Ontario, prices on the old crop are not so steady as they were a month ago. Decline so far has not been serious, but in most lines lower prices may be looked for. Malt barley is quoted at 45c; corn, 44c; extra No. 1 feed, 41c; extra feed, 40c; No. 1 feed, 41c; O. W. No. 1, 41c; O. W. No. 2, 40c; O. W. No. 3, 39c; O. W. No. 4, 38c; O. W. No. 5, 37c; O. W.
