## The Makers' Corner

Butter and Cheese Makers are invited to send contributions to this department, to ask questions on matters relating to cheese making and to suggest subjects for discussion.

## Maritime Co-operative Enterprise

The second meeting of the Pictou County Dairy Company, Limited, of Nova Scotia, held at Stellarton recently, affords still another evidence of the renewal of interest in the dairy business that is taking place in that province. This company was incorporated in August of 1913. At the last meeting the directors reported that the \$10,000 of stock offered was over-subscribed and that many farmers still wanted more stock in the business. Accordingly it was voted that \$5,000 additional stock be offered, of which about \$2,000 was taken up during the day.

The Company now consists of over 300 good practical farmers banded together in this co-operative association for the manufacturing of their dairy products, and other business. The new creamery is now nearly completed and is to be a credit to that part of the province. An immense territory is available for the company of supply, and no doubt the opening of the creamery, which will take place about the middle of May, will be one worthy of record.

The Manager, Mr. Harold Falconer, has lately returned from the Q. A. C. Dairy School, where he took the Dairy course, passing with honors, as third in a class of 47, and is now busy getting everything in shape. If enthusiasm is what is wanted to make the Dairy business a success then it is evident that this business must go, from the enthusiasm that was displayed at this large meeting, represented by the best farmers of a country almost 100 miles wide.

W. A. McKay, Provincial Dairy Superintendent, was present and assured the Company of hearty co-operation between the Department of Agriculture and the Company, and also of the valuable assistance being rendered by the Federal Department in having a cow testing record centre established with this creamery as the main centre.

Everything points towards success at the present time, and the people are justly proud of the splendid work they are undertaking. At a meeting of the Directors afterward, the officers appointed were Dan McDer, President, and Harold Falconer, Secretary-Treasurer and Manager and Geo. Thompson, Warden of Pictou Co., Vice-President.

Eighteen students successfully passed the prescribed examinations at the Eastern Dairy School, held at Pictou, four second class and eight more were on the pass list.

The attendance at the various courses of the Dairy School in connection with the Ontario Agricultural College, Guelph, for the season of 1914, was the largest in the history of the School, taxing the accommodations to the limit. The registration by courses was as follows:—Twelve weeks' course, 72; Cost-testing, 38; Ice Cream, 19; and Instructors, 7; making a total of 136. At the end of the long course, 54 students took all or part of the examinations.

## WINDSOR

**Windsor Dairy Salt dissolves evenly and gives a delicious flavor to the butter.**
