THE SUBSCRIPTION PRICE of the WEEKLY ROSELAND MINER for all points in the United States a 1d Canada is Iwo Dollars a year or One Dollar and Twenty-five Cents for six months; or all state countries Three Dollars a year—in arrably in advance. The subscription price of the Dally Miner is \$1 per month, \$5 for, in nouths or \$10 for one year, foreign \$12.50 lasin advance.

WINTER CARNIVAL.

This is about the time of the year whe the arrangements for the regular annual winter carnival should be made, and a meeting for that purpose has been called by the mayor for this evening. The attendance should be large, as the carnival has been well advertised during the rast three years, and the number present this year, both of spectators and of contestants in the various events, will doubtless be larger than on any previous occasion.

Speaking of contestants in the sports, it is noticeable that a number of our own people are fitting themselves for participation in the events. They are practising at skating, at hockey, at snowshoe running and skiing in order to fit themselves to take part in the sports. Besides this the holding of the haernal events are beneficial as they induce an interest in outdoor exercise which would not be nearly so great were it not for the stimulus given by the races and other contests. Wilfrid Laurier consolidating his power. The result is generally beneficial, as the In Great Britain a general election has exercise makes those who take it more healthy than it they remained inside shut tariff whisper being heard. In Australia up in hot rooms. What is more healthful or invigorating than a trip down one of the steeps about the city on a pair of skis? There is the short, swift rush down the slope which is full of excitement, and then the uphill climb for another rapid descent. It brings the color into the face, strength into the muscles and brightens one mentally. Outdoor sports should In South Africa the stupid Boer majority be encouraged, and all in Rossland should do whatever they can to make the midwinter carnival an unqualified success this

AN IMPORTANT SPUR.

The Great Northern railway is to build a branch up Big Sneep Creek valley and this will furnish transportation to a mining region of importance, second, perhaps, in the Trail creek division only to the section around Rossland. This railway will furnish transportation to the group of mines and mining properties on the west slope of Sophie mountain, some three of which are in a condition to ship; indeed, it is alleged that these mines can now furnish as large 'a tonnage of ore as did the mines of Rossland when the first rail limited, has in the mining section on the way was extended here . In the valley there are several promising claims, which by the incorporation, in London, of the have been partially developed, and the railway should cause them to be further company has just been registered to op operated and turned into large producers of ore. On the west side of the valley on tain. This is the third company which untains there are areas' of mineral territory which are simply awaiting the advent of transportation and development to become producers. Big Sheep Creek valley has considerable arable land and the creek flowing through it carries a large volume of water which can be utilized for irrigation purposes. Besides this there are timber limits there and sawmills will, when the railway is right or hold under bond, and, doubtless finished, furnish considerable freight for it in the way of lumber and timber, to say nothing of cordwood, which will be ent and sent to this city

It would have been better for the in-Canadian Pacific railway had constructed this mineral section are beginning to b a line from Rossland into the Sophie understood and appreciated, and now that mountain section. If this had been done the merchants of Rossland would have at least two of the mines, the progress had a monopoly of the trade there. Now, from now on should be very great. however, it will have competitors, but still it is evident that our merchants will bia deserves great credit for its entersecure a portion of the trade. The goods prise and has only reached its present can be transported from here over the condition by the hardest kind of pione Red Mountain railway and after entering work. This company went into a new the state of Washington for a mile or two will then come back into Canadian made it what it is. Up to two months territory and be taken to the mines. In since every pound of provisions, each ar this way a portion, and we believe a large ticle of supply, and every portion of the part, of the trade will be enjoyed by the steam plant which is in use had to be hand, goods coming from across the line crest of one of the steepest mountains in and consigned to points tributary to the this vicinity. The primeval forest on the Sheen creek branch will have to pay duty and there will be the usual formalities of ings erected and timbers for mining made clearing them any paying the duty, and out of the material so procured. The this will cause more or less delay.

ore from the section reached by the inconsiderable coast. A wagon road has originator of strange and startling thebranch of the Red Mountain railway becomes important, as it certainly will within a year or two, the Canadian Pacific for a railway to the productive proper- rok." and the "Cryptogram." In "Atlanrailway will realize the importance of the ties. At the three mines on the mounties" he tried to demonstrate that in the traffic and extend its tracks from this tain the Velvet, the Portland, and the Atlantic ocean, opposite Gibraltar, there public established "on the sure foundacity into that section. It will be rememhered that the Canadian Pacific did not extend its system into Rossland until it house, and the nucleus for a town has Atlantis was mentioned by the Greek gehad assumed considerable importance, and it may be that it wants the Sophie mountain section to be proven beyond the peradventure of a doubt before it expends the large sum necessary for the construction of about twenty miles of expensive railway. Be this as it may, the Great

way can be made to pay there. This ac- it has shown and it is evident from the he tried to prove that the deposits of clay, tion will open up a new section and cannot help, in one way and the other, to ing out that they will be. There is this
istic of the drift age, were the result of
vations cheerfully endured by American not help, in one way and the other, to add to the importance of Rossland, as add to the importance of Rossiand, as advantage, nowever, in the case of this most of the claims there are owned by company. It was the first to go into a The "Cryptogram" was an attempt to the hospital tents and on the field, their residents of this city. Under the circumstances the Great Northern management is deserving of commendation for its able that it secured the best that there the most elaborate manner he tried to enterprise and pluck in entering upon this is there, and so there is some compensation prove that this was revealed in a cryptois deserving of commendation for its is very probable that a mining town will spring up somewhere along the line of the spur which will in a year or two have a onsiderable population and perhaps will be the second city in size in the Trail creek division.

FREE TRADE.

The Melbourne Argus (Nov. 13) says: The Canadian exports are competitive as against the exports of Australia, and it is a question how far and how long Australia can consent to retain restrictions on trade when Canada is rapidly removing hers. As the Laurier policy is more and more developed Canada will be favored not only by her short distance but also by her lower duties. Taking a survey of the world, it may be said that the prospects of the tariff reformer were never brighter. In the United States the defeat of the defection of the gold standard men Mr Cleveland and other leaders decided that a bad tariff is a lesser evil than debased coinage but the cable tells us that they are now returning to the Democratic camp, and will reorganize the party for a campaign for commercial freedom. Thus a party, whose normal strength is well nigh half the nation, is committed to a war against high tariffism to the knife. In Canada we see Sir taken place without so much as a high a great battle for a reasonable federal tariff is about to be fought. And the byeelection in Ashfield in which the seat vacated by Mr. B. R. Wise was secured by a tariff reformer by a heavier majority than before, is a further proof of how well the workingmen of New South Wales are content with their present conditions. in the Cape parliament succeeded in imposing certain protective duties, but with changed conditions we may expect a reform in this as in other directions, the in dealing with all questions affecting the Cape falling into line with low tariff Natal. It may be no dream to imagine the government upon having obtained the whole British speaking race in a few years united by yet another tie. To the of a gentleman so thoroughly able to deal ties of blood and of language and of lit- with it in all its phases, and whose conerature may be added that of a common fiscal faith. And then the Imperial Customs union, which enthusiasts have imagined, can become a sober reality."

SHOWING THEIR FAITH.

Another evidence of the faith which the New Gold Fields of British Columbia west slope of Sophie mountain is shown Bluebell (Rossland) mine, limited. This erate the Bluebell claim on Sophie moun Gold Fields, the other two being the Velvet and the Portland. The former has something over \$2,000,000 worth of ore in sight and the latter is rapidly approaching the productive stage. Besides the claims held by these three subsidiary con panies the New Gold Fields has a num ber of other claims which they own out from time to time, it will float other sub sidiary companies to operate them.

It is fortunate for the section that se enterprising and energetic an organization has taken hold of the work of developing terests of the people of this city if the properties there. The possibilities of the productive stage has been reached by

The New Gold Fields of British Colum section of the Trail creek division and chants of this city. On the other taken in over a trail, which led over the claims had to be hewn down and builddevelopment has been accomplished only It is possible that, when the output of in the face of great difficulties and at no literary productions, and he shone as an veyors are engaged in surveying a line lantis, the Antediluvial World," "Ragna-Douglas there are now about 100 men at once existed a large island known as At- tion of equal justice to all." work and there is a church and a school lantis. This idea was not original, for been made. Those who have undeveloped ographers as situated in the Atlantic, west eth century a woman's judgment will carry pany, as they are now able to reach their dialogue, Timaeus, stated that an States Supreme court will be concur soon can ride to them over a railway in of it. MR. FOLEY'S APPOINTMENT.

the vacancy on the Chinese commission created by the resignation of Mr. Ralph Smith, M. P., will be received throughout British Columbia with the utmost sattained not only by the working classes of whom Mr. Foley is the recognized leader torily. The government did a very wise as any conclusion, on the part of the commission which are concurred in by him, will be accepted unconditionally by that of immigration. The evil of Chinese competition is felt most keenly by the working classes in British Columbia because here we have much the greatest proportion of these Oriental intruders. They One is reminded in this connection of the are, however, owing to the continually increasing influx, crowding eastward and before long Ontario and Quebec and even the maritime provinces will discover, unless the invasion is stopped, that they will have to give serious consideration to the problem which has so long confronted British Columbia. Mr. Foley, through his long residence in this province and in the centres of population, bas acquired personal knowledge of the evil, which is occasioned by the presence in large numbers of Chinese in this community, and that personal knowledge will be of great value to the commission in obtaining the data on which it will base its report to the government. He possesses, too, the entire confidence, not only of the working classes, but of the business community who regard him not only as an honest, but as a most capable and judicious man, good of the people. We congratulate the services in the settlement of this question clusions will be unreservedly accepted by the people of British Columbia.

CANADIAN IRON ORE

According to a recent issue of the Cleveland Leader, the first cargo of iron ore ever received at a port on the south nore of the great lakes from Canada was ecently unloaded at Ashtabula, Ohio, the ore having come from Michipicten, Ontario. This shipment was probably an experiment, but it may be the entering eonsiderable importance and value to the where they can sell their gold dust to the the necessity not only of coming out and was necessary to ensure the success was necessary to ensure the success where they can sell their gold dust to the the necessity not only of coming out and where they can sell their gold dust to the users of iron ore along the south shore best advantage. They spend their money voting for him when the polling day ar were made for a thorough canvass future as one of the elements in the lake iron ore trade.

Michigan and Minnesota field is practically in the coast cities, as it is nothing short inexhaustible, a large part of this is of the non-bessemer grade, and if the Canadian ores should prove to be of bessemer variation instead of remaining and adding to Although the supply of iron ore in the riety they may exert either a controlling the wealth of the country in which it is produced. A mint and assay office are on the prices for ores coming from the older ranges. There are but a limited number of furnaces in Canada, and should at once be established.

Ward I.—John Dunlop, (charman), F. W. Rolt, Alexander Gilchrist, E. D. W. Rolt, Alexander Gilchrist, E. D. W. Kenning and Steve Barbora.

Ward 2.—William Martin, (chairman), Bould work unceasingly from this time day of election and roll up for him the biggest majority which any they will develop, it is not at all probable that they will develop, it is not at all probable they will develop, it is not at all probable to the country in which it is produced. A mint and assay office are at crying necessity in the coast cities, and should at once be established.

Ward 1.—John Dunlop, (charman), F. W. Rolt, Alexander Gilchrist, E. D. W. Kenning and Steve Barbora.

Ward 2.—William Martin, (chairman), B. Johnson, L. A. Campbell, Wm. H. Graham.

Ward 2.—William Martin, (chairman), F. W. Kenning and Steve Barbora.

Ward 2.—William Martin, (chairman), F. W. Kenning and Steve Barbora.

Ward 3.—Charles B. Lockbart, (chairman), Robert Inches, D. A. McGillivary.

Ward 3.—John Dunlop, (charman), F. W. Rolt, Alexander Gilchrist, E. D. W. Kenning and Steve Barbora.

Ward 3.—John Dunlop, (charman), F. W. Rolt, Alexander Gilchrist, E. D. W. Kenning and Steve Barbora.

Ward 2.—William Martin, (chairman), F. W. Kenning and Steve Barbora.

Ward 3.—John Dunlop, (charman), F. W. Rolt, Alexander Gilchrist, E. D. W. Kenning and Steve Barbora.

Ward 3.—John Dunlop, (charman), F. W. Rolt, Alexander Gilchrist, E. D. W. Rolt, J. C. Alexander Gilchrist, E that the Canada iron industry can absorb the ore output.

It is said that those who are exploiting the Michipicoten fields hope to compete with the American iron ores, depending upon the lower wages paid in Canada to offset the tariff charges upon iron ore .-Mines and Minerals.

DEATH OF IGNATIUS DONNELLY.

On January 2nd, Ignatius Donnelly pass ed away in Minneapolis at the age of 70 years. When he left this life there went into the Great Beyond a bright and entertaining, though light spirit. In his earlier manhood he practised as a lawyer, but the latter portion of his career was devoted principally to politics and literature. Last fall he was the presidential candidate of the middle-of-the-road Populists. as chief claim to distinction lay in his been constructed and now a corps of sur- ories. His three principal works are "Atproperties in that vicinity will have the of Africa, just over against the pillars of as much weight as a man's. Woman will benefit of considerable of the pioneer Hercules. One of the earliest writers to sit with men on the higher benches of work done by the New Gold Fields com- mention the island was Plato, who in his that day and decisions of the United. properties by means of a wagon road, and Egyptian priest gave Solon a description in by as many women as men. That ex-

Creek valley and is satisfied that a railadvantage, however, in the case of this the earth coming in contact with a comet. women in time of war, their service in section that has many rich properties, prove that the plays which are credited to prove that the plays which are credited to willing surrender of their only support Shakespeare were written by Bacon. In and of all that is dearest to them-all he alleged showed that Francis Bacon and not William Shakespeare was the author of the most wonderful literary pro-The appointment of Mr. Chris Foley to few were convinced that his contention was correct. The idea was so out of keeping with that held by the majority that after considerable discussion, which isfaction and this feeling will be enteris spoken, the "Cryptogram" was rated one of the literary vagaries of a man who in the interior of British Columbia, but ing and ingenious theories rather than seemed bent on advancing novel, surprissire to see this question settled satisfacnot care for writing for the future and and proper thing in appointing Mr. Feley, lived in the present and seemed to desire to attract the ear and eye of the public for the moment rather than for an extended period. Therefore he seemed to strive great class of the community, not only in solely to catch the wondering attention of fnis province, but in the east, who are his contemporaries, and to care nothing most immediately affected by this sort for posterity or what would be thought of him after he was dead. He came in for no little censure, too, for endeavoring to rob Shakespeare of the credit of writing the plays which he is credited

words of the immortal bard: "He who robs me of my purse steals 'Twas mine, 'tis his, And has been slave to thousands.

But he who filches from me my good Steals that which naught enriches him And makes me poor indeed.

A MINT AND ASSAY OFFICE.

It is doubtful if a stronger argument could be adduced than the following in favor of the establishment of a mint and assay office in either Vancouver or Victoria: For the year 1900 Assayer Fred A. Wing of the United States assay office at Seattle said that the receipts at the office have been 46 1-8 tons of gold and silver. The total quantity of gold for the year was 1,345,122.41 troy oances, with an assayed value of \$22,038,755.12, and it represented the individual deposits of 7,106 ersons. Over \$16,000,000 came from the Klondike and the remainder from other parts of Alaska, British Columbia, Washington and other states. Nome's output was \$3,723,272.14, which is considered good, taking into account the lack of water there and the almost endless litigation. If the mint and assay office were established in either Victoria or Vancouver, or perhaps, it would be still better to place the assay office in Victoria and to place the assay office in Victoria and to Mr. Lakonde's meeting last night for the give Vancouver the mint, then a large purpose of organization was extremely percentage of the Klondike gold which well attended and was a thoroughly represented but also from the fact that it represented but also from the fact that it represented but also from the fact that it represented the control of the fact that it represented t would be disbursed there. As it is at facilities, easily provided the miners of therefore, that the Federal parliament will soon realize the urgency of the situation and establish these two useful institutions to neglect this proper campaign work ow-

In the New York Herald some of the dvanced women of the present century tell what the sex will do in the next, says the Minneapolis Tribune. Such leaders as Mrs. J. Ellen Foster, Carrie Champman Catt, Mrs. Russell Sage, Mrs. Donald McLean, Edith J. Griswold, Ellen Spencer Mussey, Mrs. William Tod Helmuto and Miss Annie Russell, cast horoscopes very one of those distinguished thinkers Mrs. Foster writes of woman's power in politics. She declares that woman's She finds nothing inconsistent with the ors the Queen could bestow upon him corded man. If she is taxed she has as and the entire British Empire will rejoic good a moral right to representation as to see that their sovereign has been so had the colonists who fought for that right, says Mrs. Foster, and the end of the Twentieth century will find the re-

The her progress during the next hundred ranted in their predictions.

THE CAMPAIGN.

The mayoralty candidates have now go down to work on a business basis, and Inauguration Meeting — Representative we expect to see the campaign assume a lively aspect from this time forward. Mr. Lalonde's meeting last night for the finds its way to Seattle would remain in sentative one. On his executive commitsentative one. On his executive commit-tee are quite a number of miners and staunch members of organized labor, who these two British Columbia towns and the are quite a number of miners and to present, owing largely to the lack of these are enthusiastically supporting him. With these are joined many prominent business the Yukon pass by these towns and go to men. We would impress upon the electors to see that all their friends come out and vote also. It would be a serious blunder to neglect this proper campaign work owthe wealth of the country in which it is might have otherwise have been convertproduced. A mint and assay office are ed into a signal victory. Mr. Lalonde's in Rossland.

LORD ROBERTS HONORED.

General Roberts has been rewarded for his services by being made an earl and a Knight of the Garter. It is speciall provided that the title shall descend through his daughters. Earl Roberts has no son, as his only son was slain early each in her peculiar line of endeavor and in the South African campaign. The Cr. der of the Garter has less than 50 mem claims that woman's progress will be as bers. It numbers among these the Emgreat during the twentieth century as it peror of Germany, King of Denmark, as been in the course of the nineteenth. King of the Belgians, King of the Hel lenes, King of Italy, King of Portugal, Marquis of Salisbury, Duke of Argyll and oncern for her child, for her family and a number of dukes, earls and princes. So for her own development should impel Bobs is in good company, as the Order her to struggle valiantly for her rights. of the Garter is one of the highest honmost sacredly conscientious maternity in Certainly he is deserving of great honor the exercise by woman of the rights ac and has received no more than his due gracious, so kind in this case, as she always is with those who serve the empire faithfully and well.
