

# BONANZA VERY BUSY

## An Immense Amount of Summer Work

### Big Dredger on 42 Below Taking Out \$2,000 Daily—Much Hill Work.

Mining on lower Bonanza still continues to draw nearer Ogilvie bridge. No. 107 below Bonanza is doing an immense amount of work this summer, and it will not be surprising to hear of other work being done still farther down.

No. 97 below Bonanza is being successfully worked by the Holcomb Bros. this summer as it has been during the past two years both winter and summer, and the boys say work will not cease until the whole claim is worked out.

The amount of work done on Lovett gulch would surprise anyone who has not been in that region this season. The gulch and hillsides are white with the dumps peculiar to that region.

Mr. W. O. Smith still continues to serve Lithia water to the thirsty travelers as they pass Bonanza park at 76 below, which is superior to any of the waters of California and eastern springs.

Oro Fino hill is doing more work this summer than at any time in the past. Four big plants which practically include the hill are in full blast. Messrs. Sollers, Hickey and Lamb are working the Herdman claim with J. J. Hickey at the helm. \$40,000 was refused for the above claim this summer and the smile that passes over Mr. Hickey's countenance during the cleanup is a sufficient indication of the prosperity of its owners.

Messrs. Cariston, Rumsey and their associates are taking out large quantities of dirt from the old Wells claim, and if the meals that are served to the men at their camp are a criterion, the boys are doing a fine business.

Mr. Chas. Fair is working the old Collins claim and taking out big pay.

Messrs. Lamb and Austin are still working the Day claim and taking out more dirt than during any previous seasons. Nearly a hundred men are employed in various ways on the above claims, and altogether Oro Fino hill is one of the liveliest hills in the country.

Messrs. Shultz and Anderson, formerly of Monte Cristo, are working a big crew of men on 46 below Bonanza.

Messrs. McKay & McGilvery of 14, 15 and 16 below are working big crews of men this season again. Mr. McKay says it will take three or four more years to work out their ground.

Mr. Frank Phiscator of 2 Eldorado has just set a new steam shovel on his claim, which it is said will do the work of 60 men.

The big dredger on 42 below Bonanza is working this season again, and is a big success. It is asserted that for the short time the dredger was at work last season \$60,000 was taken out, and for this season \$2,000 per day is a fair estimate. When the thawed dirt is all taken up holes are drilled into the frozen ground to a depth of 12 or 14 feet, and shots put in to loosen the ground, which allows the water to penetrate the frozen dirt and thaw the same, so that all the pay dirt on the claim can be taken up. The first cost of the machinery and former experiments on Cassiar bar have cost the promoters a fortune, but they are now reaping the reward of their labor and perseverance.

Mr. Harry Heffner has secured the contract for putting down a shaft on the Lone Star group of quartz claims above Victoria gulch, which have recently been bonded by a syndicate of prominent Yukoners. Mr. Heffner is to put down a shaft to a depth of 150 feet and crosscut the ledge at the bottom of the shaft. Harry is an old quartz miner of large experience, and will begin operations at once with a large crew of men, and will push the work day and night until the contract is completed. Mr. E. F. Carthay, one of the original locators, will be on the ground during the season to look after the interests of himself and associates.

Mr. Chas. E. West of Victoria gulch has some very peculiar pets around his cabin. Others have squirrels and birds about them, but it is left with Mr. West to have a big swarm of yellow wasps about the place, with a nest just over the front door, while the birds and squirrels come into the cabin and eat with him during meal hours.

### Turner to Command

Special to the Daily Nugget.  
London, July 21.—Col. Turner, V. C., D.S.O., has accepted the command of the colonial units acting as the king's escort at the coronation. The offer came from the imperial government. The detachment will include representatives from Canada, Australia, Tasmania, India, Ceylon, Hong Kong and the West Indies.

### Steamer Accident

Special to the Daily Nugget.  
Berlin, July 21.—The steamship Primus, owned by the Hamburg-American line, was cut in two and sunk by the tug Hansa on the river Elbe this morning. Fifty persons were drowned, of whom thirteen bodies have so far been recovered. The Primus was an excursion steamer.

### Closed to Trade

Special to the Daily Nugget.  
Washington, July 22.—Carupano, Venezuela, is officially declared closed to trade and merchant shipping will be given a fortnight to get away before the ports are blockaded.

The Nugget's stock of job printing materials is the best that ever came to Dawson.
