RAILWAY COMMISSIONS

Of Canada and United States May Solve Plan to Control International Railway Lines—A Gigantic Task

NEW YORK, Aug. 11.—A preliminary meeting, designed by its promoters to pave the way for an agreement between the Inter-State Commerce Commission and the Railway Commission of Canada, whereby international commerce shall be regulated, was held in the Hotel Manhattan today.

Martin M. Knapp, chairman of the Interstate Commerce Commission and J. P. Mabee, chief commissioner of the Railway Commission of Canada, were the conferees. Both men made it plain that the conference, which will extend over several days, will likely result in the adoption of a tentative working agreement, this later to be elaborated on and it is hoped adopted, by the commissions. The traffic by rail and water is being considered in all its international bearings. Though there has not been any clash on international commerce during the last few weeks, there has grown up a necessity for a common understanding between the commissions in this country and Canada, because of the great increase in trade between the two nations.

Every feature of the work of the two commissions, as applied to both Canada and the United States will be considered by the two chairmen in order to discover how a plan applicable to both countries can be worked out. This will be a gigantic task and it is unlikely that even a preliminary report can be completed for some time.

GAYNOR RECOVERS

New York's Mayor is Pronounced Out of Danger

NEW YORK, Aug. 15.—Mayor Gaynor showed further improvement and strength today, and his seventh day found him rapidly emerging from the danger zone. The early morning bulletin of his physicians showed the wounded executive head had passed an excellent night. The first official bulletin issued at 8 o'clock was as follows:

"Mayor Gaynor has passed a good night and slept well. He has taken nourishment well and is in good general condition this morning. Temperature 99.4-5, pulse 70."

The police are engaging themselves in a theory that James J. Gallagher, the assailant of Mayor Gaynor, has an accomplice, but Gallagher denies this. A man with a police record is under suspicion.

Harvester Killed

OGLIVIES, Man., Aug. 16.—The body of an unknown man, supposed to be a harvester, was found along side the railway track near here this morning. It is presumed that he fell from a westbound Canadian Northern express which passed through shortly after midnight. The remains were discovered by a trainman on a west-bound freight. Coroner Ross of Gladstone, is investigating the case.

MORTLACH, Sask., Aug. 15.—

A hail storm yesterday damaged many hundreds of acres of standing crop in the district south of the railway track. Many farmers will suffer from 50 per cent. to total loss.

WHEAT MARKET

(By Thompson Sons, Ltd.)

WINNIPEG, Aug. 13.—During the past week the chief influence that has impressed itself on the wheat markets has been the condition of the French wheat crop. Several days more of very wet weather have visited that country right in the midst of harvest, causing further loss in quantity and damage to quality and in the middle of last week it was reported that French importers were buying heavily of cargoes on passage. The reports of this buying and the reports of continued bad weather in France caused a mild panic among the shorts on the American speculative markets, which on Friday resulted in a very sudden and sharp upturn in prices. The shorts interest rushed to cover and investors bought freely and prices went up to 1-3/4 to 2-1/2c for the day. The bulk of the business being done as present seems mostly of a speculative nature, and the little scare of last week was soon over and prices have eased off again, so that at the close of business today there is seen very little change in prices from what they were on this day last week. We do not think any special development in any other direction has taken place during the week.

U. S. Shows Shrinkage

There has been some further confirmation of the large shrinkage of the Russian crop as compared with last year's record crop in that country, and the only other circumstance of note is the estimate made by the issue of the August report of the Department of Agriculture of the United States Government. The report estimates that on August 1 the indicated probable yield of the winter wheat crop in the United States for this year was about 458,000,000 bus. and of the spring wheat about 211,000,000 bushels, suggesting a total yield of 669,000,000 bushels, which compares with a total of 737,000,000 bushels final estimate of the crop of 1909.

The Government report was regarded by the trade as bearish and prices sold off some on the strength of it, but almost immediately the strong European situation quenched any tendency to weakness in the markets on this side of the Atlantic, and by today the August Government report is no more thought of. While the strength of the European situation has this week been more in the limelight than any other factor the American and Canadian spring wheat situation has no doubt had an important influence on the prices current, and now somewhat in the background by reason of it having become familiar in the lapse of time. Over the spring wheat country the weather for the week has been ideal for the time of the year.

Ideal August Weather

An odd refreshing shower deepening at some points into a summer downpour by reason of electrical accumulations, gave seasonable moisture for a normal summer time and the bright warm sunshine of the days have alternated with the bright cool atmosphere of dewy nights, making ideal August weather for any country in northern latitudes. This weather has prevailed for over three weeks and while it cannot undo the cruel work of the burning June, it has stopped further deterioration of crops badly damaged, and has greatly improved all crops which by its circumstance of fortune have been susceptible to improvement.

Over the Canadian West we consider the weather has been of great service in increasing the growth and yield of all crops. During the week the statistical changes in the world's wheat situation encourage an easier instead of a stronger market tendency. World shipments were larger than expected, 13,444,000 last year, and the world's visible supply, according to Bradstreet's, increased for the week 2,856,000 bushels, compared to a decrease of 2,881,000 bushels a year ago.

The United States visible supply increased 2,423,000 bushels on the week against an increase of 685,000 bush-

SCOTLAND YARD

Some sprightly American commentators on the Crippen case have amused their readers by heaping ridicule on the detective methods of Scotland Yard. They seem to think that the very spirit of stupidity brooded over the operations of the London police force in all its dealings with Dr. Crippen. On the other hand, a few thoughtful papers have found something very admirable in the fairness with which the suspected man was treated, and the energy with which he was sought when fresh evidence of his guilt was brought to light. The unknown is always a subject of ridicule for the flippant, and the methods of Scotland Yard are almost unknown to the British police is the familiar American "third degree."

Drought in Argentina

There is little that is new in the crop situation on the week, except further loss to the French crop by wet and stormy weather. Wet weather has been rather general over Western Europe, interfering with harvesting in Germany and the United Kingdom. Russian reports are rather better but in Italy the yield is disappointing and quality poor, so that an extra demand for foreign wheat is certain, Italy being a large importer every year. In other European countries the crop outlook is practically unchanged. We have no word this week about the Australian crop. The new Argentine crop is practically all secured, but drought has been prevailing over the early northern districts and the crop prospects for the country are just a little uncertain for the present, but it may improve immensely or develop poorly according to the kind of weather that follows through the season.

Winnipeg Markets Strong

Our Winnipeg market has held very strong during the week. There is a considerable short interest in the October option, which gets very bold when U. S. markets decline, and sells shorts freely, if not rashly, and whenever markets become strong again this interest helps to cause quick and large advances here. Our own crop as regards its prospective size or condition has little influence on our markets compared to the ups and downs in the Minneapolis and Chicago markets. In the last few days a strong demand for cash wheat has manifested and practically all of the available cash wheat has been picked up, although the visible stocks are larger than a year ago.

A larger proportion of the stored wheat than usual belongs to farmers, but the largest proportion belongs to the large millers who will need it to carry them into the new crop. If the weather continues dry new wheat will soon move freely as harvest is progressing at about three weeks sooner than usual.

The oat market was firmer in the early part of the week, but easier in the last three days, and trade is quiet. Still there is nothing doing in barley and no prices are quoted. The flax market keeps strong but there is almost no trading in it.

Faster Than Birds

Amiens, France, Aug. 16.—The first real race between the birds of nature and of man took place today in the great cross country race, and was easily won by man. Forty-seven carrier pigeons were released at doulis today at the same instant that Leblanc and his Farman bi-plane started from the mark on his fifty mile flight to Amiens. Rushing within a tremor through the calm air, a tremor alert and imperturbable, he was not represented as a purely inductive "Time and place cannot blind Mr. Bucket. Like the man in the abstract, he is here today and gone tomorrow; but very unlike man; indeed, he is here again the next day." The fact that London, in proportion to population, has about the best record of any large city in the world in the matter of unpunished crimes of violence is pretty good evidence that there are more Buckets than Joneses at Scotland Yard.—Mall and Empire.

METHODIST CONFERENCE

Opened in Victoria on Sunday by Great Love Feast—Sermons by Many Noted Divines

VICTORIA, B. C., Aug. 14.—The Metropolitan Church, the centre of interest to Canadian Methodists during the general conference, has been crowded today to overflowing at the opening service. The weather conditions for which Victoria is famous, prevailed.

The services opened with a love feast at nine-thirty this morning. This is an observance peculiar to the Wesleyans. Principal Spurling, of Winnipeg, was leader, assisted by aged laymen such as Judge McLaren, of Toronto, J. R. Knox, Montreal; Dr. Inch, of N. B., and Judge Tesley, of N. S. A testimonial meeting followed in which clergy and laymen from all parts of Canada, from China and Japan and from various walks in life, related their religious experiences. The regular service was in charge of Dr. Carman, Rev. Mr. Holling, pastor, and Mr. Moore, general secretary.

Rev. Henry Haigh, fraternal delegate from England, preached, taking as his subject, "Lessons from the life of John the Baptist." He emphasized the ever recurring need of breaking away from popular notions of sincerity in religion, and he able to stand the tests of popularity and unpopularity. Mr. Haigh speaks easily, is informal in manner, simple and direct.

This evening Rev. Dr. Cleaver, a former pastor, was well known through Canada, preached from Ezekiel's vision of the growing stream, in the pictorial style of which he is an able master, set forth the origin, force and destiny of the gospel stream. The delegates are nearly all here and girding themselves for the opening of what is expected will be a strenuous, critical and historic session.

Among the fraternal delegation present is Rev. Wm. Brocken, of Dublin. He is very scholarly, genial man, and has made himself popular already.

VICTORIA, B. C., Aug. 15.—Following are some interesting statistics relating to the census of Canadian Methodism as compared with last quadrennium.

Statistics are not generally popular. It is not every one that can speak or write about them as attractively as Gladstone, yet safe business principles demand figures as a test of progress or prosperity.

The membership by conferences is as follows:

Conference	Members
Toronto	58,562
London	50,623
Hamilton	52,488
Bay of Quinte	40,876
Montreal	38,724
Nova Scotia	16,184
N. B. and P. E. I.	14,487
Newfoundland	13,634
Manitoba	17,980
Saskatchewan	15,858
Alberta	10,650
British Columbia	9,800
West China Mission	1,825
Total	340,091

The increase for the last Quadrennium is 22,274. The only conference showing a decrease is Nova Scotia and that only 127. It is to be noted also that the Japanese conference with a membership of 3,317 previously counted, has passed under the jurisdiction of a Union Methodist church in Japan. The growth in membership by quadrenniums is as follows, showing for some reason the largest expansion between the years 1887-90:

1884-1886 was	27,699
1887-1890	36,398
1891-1894	27,080
1895-1898	19,584
1899-1902	11,358
1903-1906	25,822
1907-1910	22,274

Total 1910 was 340,091. The membership of the united conferences in 1883 was 169,803. In the 27 years the increase therefore, amounts to 170,288—a very substantial offering towards leaving the nation.

Large Funeral

ORENFELL, Sask., Aug. 15.—The funeral of the late Benjamin P. Richardson was held here Thursday afternoon at 2 o'clock. The Methodist Church, where the services were held, scarcely afforded accommodation for the large crowd that gathered to pay tribute of respect to an honored citizen. Short addresses were delivered by Rev. Mr. Mitchell of Toronto; Rev. Benja. Mitchell; Rev. J. H. L. Jostyn of Orbow and Rev. Hugh Dobson, of Grenfell, each of whom paid tribute to the large place which the deceased had filled in the development of the community and above all to the place he had occupied in the lives of those with whom he had come in contact.

The procession which followed the body to the cemetery was one of the largest in the history of this district. The service at the cemetery was conducted by Rev. Hugh Dobson.

The following acted as pall bearers: Sheriff Murphy of Moosemin., Levi Thomas of Wolseley and H. Coy, Edward Adams, T. W. Wright and Ed. Switzer of this town.

Land Steals

SULPHUR, Okla., Aug. 15.—Details of an alleged scheme by which land grabbers organized systematically to enrich themselves at the expense of Minor Indians, was related at the congressional investigation in Indian land affairs today. In one instance, it was asserted the cost of disposing of the property of an 18-year old Indian was \$2,075 more than the property brought. Conditions which permitted this and similar deals was declared to be a "disgrace to Oklahoma."

A Great Inventor

A few days ago a Pittsburg despatch announced that George Westinghouse had been ousted from the presidency of the great industrial corporation that bears his name. High Finance writes the word failure after one of the greatest names in industry and Mr. Westinghouse steps down from command of the vast enterprises that his genius, both as inventor and practical man of affairs, called into existence. It is hinted that there would have been no pressure brought to bear upon him had he been willing to become a high financier too. Certainly, Westinghouse is the very antithesis of the inventive genius of popular fiction. For forty years he has been a successful man of affairs, one of the greatest promoters of his generation, and had he never invented anything more important than a toothpick, the world would still have heard of him.

Don't Hope for the Best—GET IT!

The New Improved DE LAVAL SEPARATOR

Every man who buys another cream separator HOPES it is as good as the De Laval. Eventually he learns it was a vain hope and that the imitation is inferior. Therefore it is well to buy a De Laval in the first place and be SURE. It actually costs less than the other kind, capacity, convenience and length of service considered.

Write for catalogue and free trial of a New Improved De Laval.

WANTED

Board and Lodging For 100 Students. Persons who can furnish the above are asked to correspond at once with T. E. Perrett, Principal, Provincial Normal School, Regina, stating the nature of the accommodation at their disposal, prices, etc., and giving street addresses. (20-21)

plished, as was many another mighty enterprise. It was then that the first direct criticism of his financial methods was heard. At that time expressions of sympathy and respect came from all parts of the country and from abroad. It was everywhere recognized that in the world of business his integrity was on the same high plane as were his intellectual achievements and no financial man could deprive him of the esteem in which he is held by all who know him.
