Bonavista Notes.

The survey of the railway was completed here on Saturday last to within a short distance of the town. It is very evident that Harbor Pond is to be the site of the station. No better site could possibly be fixed on, as it is central and always accessible.

We got one glimpse of the comet, but all interest in the luminary took a secondary place when it was announced that Mr. Coaker was coming to lecture to us about the Fishermen's Union. So on Friday night we put in an appearance at the Orange Hall to hear what he had to say. He introduced himself as the President of the Fishermen's Union, and after explaining its aims and objects, made such startling revelations as to how badly the poor fishermen were being treated by the Government and the merchants as nearly took our breath away; but when he said he had never taken a cent in payment for all the work he had done for the Union, and that he did not intend taking any at any time, we began to breathe more freely.

It appears that we have been laboring under a serious delusion. We never doubted for a moment but that Sir Edward Morris was at the head of the Government, but Mr. Coaker has "let the cat out of the bag" when he told us that it was "I" who forced the Belle Isle Ore Co. to pay a royalty on ore, that in the near future he was going to make demands upon the Harmsworth Company for similar concessions; "that it was I and John Crosbie who put the price of fish up last fall," though he admitted afterwards, unwittingly, that it was a providential thing that last year's voyage was a small one, otherwise the price would have been as low as in 1908. The same big I guarantees all of us who join the Union that we will get 10 per cent, off all our purchases; "that it was I and John Crosbie who put the price of fish up last fall," though he admitted afterwards, unwittingly, that it was a providential thing that last year's voyage was a small one, otherwise the price would have been as low as in 1908.
