with utmost care and are protected n every way. They are kept from ust, dirt and jars, and are conidered objects that need every atten on and consideration. Yet despited this care one is never sure that ney are right. On the other hand speedometers, the mechanisms of which are equally as delicate, are lriven through dirt, storms, sand mud, and over bumps, ruts and rock —anything and everything—and still the suspicion that they are not registering correctly seldom enters

"Why is this?" asks Harold Tich bourne, of the Ontario Speedomete Service, 91 York street, "We give i up, but this we do know, that it is as important to have your speed ometer right as it is to have you imepiece telling you the right time "We have the only complete equip-ment in the city for testing and call-

orating—making speedometer register correctly—and we do this work on all makes of speedometers. "Many times we are told by a cus-omer that he is having his speed ometer adjusted because he has fined for speeding. They find that having this necessary work done is less expensive in the long run than

other day a man for whom "The other day a man for whom we had done some work was heard to tell another motorist: Well, I beat the magistrate to it by fining my-self \$1.50 to have my speedometer put right. It isn't much, either, when you figure that you always have the satisfaction of knowing just how fast or how slow you are travelling."
