Grain Falls Below Dollar Mark For July Delivery in Chicago.

CLAIM BIG SURPLUS

Chicago, Ill., July 12.-Wheat and flour are at the lowest levels since before the war. Wheat for July, delivered in Chicago, dropped below the dollar mark yesterday for the first time since the beginning of the war in 1914 and at the same time Minneapolis millers cut the price of family brands of flour in carload lots

to \$6 a barrel, the lowest since 1915. work over, and a general readjustment of grain values towards prewar conditions as fundamental causes depression. The drop was for the further celerated by more optimistic reports from the northwest, where it had been reported wheat was be-

ing damaged by rust. Trading yesterday was feverish. In Chicago July wheat sold as low as 99%c a bushel and closed at 99%c. December reached \$1.01, its lowest since November, 1922, when it fell to 98c. It advanced 1½c at the close of the market, however. At Minneapolis spring wheat sold at the lowest since 1916.

Authorities generally admitted \$1 wheat would not permit the farmer production cost, and Gilbert Dusler, market statistician for the American Farm Bureau, said that if September and December wheats go as low would mean a loss of \$80. 000,000 to the farmers of the United

COMMENDS LOW COST OF HEATING SCHOOL Board of Education Will Test New Style Grate At

Boyle Memorial. R. H. Fryer, representing the R. H.

Fryer Company of Toronto, an expert in all matters pertaining to ombustion, who was present at the meeting last night to interest the London Board of Education in the Hoffman patent fuel-saving grate, complimented the board on the very low operating cost of its heating. In reference to a remark by Capt. Robinson, clerk of works, on the coal consumption last year in one of London's schools, he said: "That is the lowest fuel consumption I have met with so far in my travels. There is nothing like that in any of the Toronto schools."

In his talk to No. 2 committee Mr. Fryer proved himself a worthy sales-man, and succeeded in interesting the members in his patent to the extent that they agreed, after going thoroughly into the details of the working of the grates, to try an experiment with one in the Boyle

orial School. The agreement entered into by the committee, which has to be ratified by the full board, contains a guarantee by the Toronto company stat-ing that in the event of the grate proving unsatisfactory after a reasonable test it will be removed, the price returned and the old grates replaced free of charge.
