We are informed that in consequence some grocers are recommending other, cheaper and inferior brands. CONSUMPTION

And all diseases of the Head, Throat and Chest, including the Eye, Ear and Heart, successfully treated at the

Ontario Pulmonary Institute,
No. 125 Church Street, opposite the Metropolitan Church, Toronto, Ont., M. Hillon, William, M. D. M. C. P. S. O., Proprietor.
The only Institute of the kind in the Dominion of Canada.

All diseases of the respiratory organs treated by the most improved medicated inhalations, combined with proper constitutional remedies for the liver, stomach, and blood, etc.

Nearly 40,000 cases successfully treated during the past sixteen years for some form of head, throat or lung trouble.

There is no disease with which the human family is afflicted so deleterious in its effects, so loathsome to the sufferer, and so fatal in its consequences, and yet so neglected as catarrh. The danger of regarding the first and earliest symptoms of the disease as trifling, and still less are they aware of the many diseases entailed upon them, and of which catarrh and cough are the exciting cause. Foremost among them stands consumption, the destroyer of millions, while prevalent to an alarming extent in bronchitis, laryngitis, asthma, and other dangerous affections of the throat and chest. You may think that we give it no importance to these trifles, but go to those among your friends who are now in the last stage of consumption and ask them how their disease began. They will almost invariably instance that you of a slight cold, a hacking cough, or a little soreness in the throat, which were treated as so very trifling a matter a few months ago, and will add, their cough grew worse. The name of consumption would have been spoken of them to a considerable extent. That name was withheld, and in fact, security they have journeyed onward to the brink of the grave, now waiting to receive them. There is one point to which we would draw attention—that the unwillingness of those suffering from it, to acknowledge the disease, and to acknowledge themselves in any stage. Many lose their lives by waiting to see what will become of their cold and cough. Nothing is gained by leaving you cannot be cured. Never give way to despair or listen to the bad advice of a narrow-minded person who has but one routine, never cured a case, never saw a case cured, never knew of any other treatment but his, but has one idea, and who would discourage you from ever trying to get well. Those who desire treatment should send no time in writing. If you can come to the Institute this month or this week it may be the greatest possible time to get you cured. If you are unable to call personally at the Institute, write for a "List of Questions" and Medical Testimonials, addressed
