

**CONSTANT PAIN
AFTER EATING**

The Tortures of Dyspepsia
Corrected by "Fruit-a-lives"

St. Marks's, N.B.
"For two years, I suffered tortures from *Secret Dyspepsia*. I had constant pains after eating; pains from the sides and back; and horrible bitter stuff often came up in my mouth.
I tried doctors, but they did not help me. But as soon as I started taking 'Fruit-a-lives', I began to improve and this medicine, made of fruit juices, relieved me when everything else failed."

The Safest Matches
in the World
Also the Cheapest

Eddy's "Silent 500's"

SAFEST, because they are impregnated with a chemical solution which renders the stick "dead" immediately the match is extinguished.

CHEAPEST, because there are more perfect matches to the stick box than in any other box on the market.

War time economy and your own good sense will urge the necessity of buying none but **EDDY'S MATCHES**.

**RENNIES SEEDS
For Better Gardens**

"EVERY back yard should be used for the cultivation of fruits and vegetables"—says the Food Controller's Bulletin. Market Gardens must be worked to capacity. But all this effort is wasted unless the seeds sown are capable of producing sturdy, vigorous plants. Plant Rennie's War Garden Seeds and insure a full crop!

**DRAFTEES MUST GET CONSENT TO
JOIN R. F. C.**

New Order Sends all Men to Depot Battalion First

Men called up under the Military Service Act will no longer have the option, hitherto extended to all draftees, of enrolling in the Royal Flying Corps before joining the Battalion to which they have been allocated. This is the interpretation given at Recruiting Headquarters of the R. F. C. to an order recently issued by the Militia Department, which says that in future all draftees must report for service to the Depot Battalion.

Such men, however, will still be eligible for the Air Service. After reporting to this Depot Battalion, the draftee may, if he is anxious to train for an aviator in the Royal Flying Corps, apply for discharge to his Commanding Officer, upon whose consent he may re-enlist in the R. F. C.

Just what effect this new regulation will have upon the number of recruits applying to the Flying Service, it is difficult to say. At the present time, despite the fact that all cadets enroll voluntarily, the training school in Toronto is kept filled to capacity and there are many young men waiting to get started. The new procedure undoubtedly puts added difficulties in the way of aspirants, but at the same time it is anticipated that the Commanding Officer's consent will in most cases where men pass the essential qualifications be given readily, while the fascination and novelty of the aviator's work should be sufficient incentive to most men to make the extra effort called for by the new regulation.

Not One Quarter Produced

Not twenty-five per cent of the available maple trees in Canada are being tapped. Statistics show that out of 55,000 farmers in Eastern Canada who produce maple sugar and syrup at all, only very few tap more than a quarter of the trees they have available on their farms. This twenty-five per cent production is worth \$1,500,000 annually. This amount might be easily doubled. One man can take care of boiling the sap from 5000 trees as easily as from 500.

Cincinnati Man Discovers Drug That Loosens Corns So They Lift Out

Good news spreads rapidly and druggists here are kept busy dispensing freezings, the recent discovery of a Cincinnati man, which is said to loosen any corn so it lifts out with the fingers.

A quarter of an ounce costs very little at any store, which handles drugs, but this is said to be sufficient to rid one's feet of every hard or soft corn or callus.

You apply just a few drops on the tender, aching corn or toughened callus and instantly the soreness is relieved, and soon the corn or callus is so shriveled that it lifts out without pain. It is a sticky substance which dries when applied and never inflames or even irritates the surrounding skin.

This discovery will prevent thousands of deaths annually from lockjaw and infection heretofore resulting from the suicidal habit of cutting corns.

Maple Sugar Profitable

Sugar maple trees are a specially valuable asset to a farm this year. Regular commercial sugar is scarce and high. There is money in maple sap, and beyond the work it is practically all profit. You don't have to plough or harrow, or fertilize the ground for the maple harvest. You don't have to do any spring seeding, and you don't have to wait patiently from spring to fall. The maple season comes at a time when other farm work is slack. The trees require no spraying, pruning, fertilizing or watering. They stand as a rule on unutilized or rocky land. The maple tree was a Godsend to Canada in the pioneer days. It is no less so now in the war scarcity of sugar.

The New Maple Law.

The New Pure Maple Sugar Law gives the public protection against adulterated maple products. The scarcity of cane and best sugars this year will also make it less profitable to mix them with maple flavoring extracts. The markets of Canada and the United States are eager for pure maple syrup and maple sugar, and the new law has restored public confidence.
