MA, I AM CURED !

correspondent from Jackson, Mich, writes us that last December her son, aged fifteen years, was very ill with valvular heart disease. « He grew very weak and could see no one : the slightest noise would make him jump in his bed and his heart would beat so violently as almost to smother him. We began a novena to St Anne and used some of St Anne's oil. During the novena he did not improve and on the last day, after the mass that was said for him, he was exceedingly weak. The doctor had very little hope of his recovery. In the evening I hung a medal of St Anne around his neck and put it over his heart, praying St Anne, if it was God's Holy will, to cure him. Immediately he spoke aloud and said : « *Ma, I am cured* I can get up. » He fell asleep and felt well in the morning. His heart has never lost any beats since ; though weak in body, he is improving all the time and growing stronger. His heart beats regularly and his nerves are stronger. I hope, when he is able to travel, to go to Beaupré and that St Anne will completely cure him. »

HEART DISEASE CURED

WE have received the following from Minneapolis.
« For three years I have had heart trouble and it gradually grew worse until the 4th of March when I had to take to my bed. I received the last Sacraments, and every one, including myself, thought I was going to die. I placed myself in God's hands and said : « Thy will be done » Yesterday morning I was so low that they sent for the doctor and my husband, but before they reached here I was up and working, thanks to God and to St Anne whose relic I carry on my neck. I also wear a medal of St Anthony of Padua. A friend also gave me a cross which has 20 relics in it. Today I feel better than I have felt for 3 years, for I have no pain anywhere. I went to the door to receive the doctor. I cannot express his surprise at seeing me up. He exclaimed : « It is God's work ! » Father André also came a few minutes later and said the same thing. Several witnesses are prepared to attest the truth of what I have said. St Anne also cured me 4 years ago of a terrible disease. »
