

MORE MILK & BUTTER

Has no Equal as a Butter and Milk Producer

Milch cows need food rich in nitrogen for two reasons: To rebuild the ordinary waste of tissue and to secure the protein necessary for the milk. This is why, as a producer of butter and milk, nothing can equal

"MAPLE LEAF" OIL CAKE

(FINE GROUND OR NUTTED)

This splendid food is so rich in protein that British farmers send four thousand miles to secure it. It increases the flow of the milk and adds to the richness of the cream. Made by the old process and guaranteed absolutely pure.

"Maple Leaf" Oil Cake is made in Canada, from Canadian Flax, and with Canadian labor and money.
