

Langenbeck. It is a pleasure, indeed, to look at the faces of those who have done so much for the profession, and especially for surgery. The book is a very handsome one, and the paper and type most attractive to the eye. We cannot but speak well of the labors of the author.

A TEXT-BOOK OF DISEASES OF WOMEN.

By Chas. B. Penrose, M.D., Ph.D., formerly Professor of Gynecology in the University of Pennsylvania. Sixth Revised Edition. Octavo of 550 pages, with 225 original illustrations. Philadelphia and London: W. B. Saunders Company, 1908. Cloth, \$3.75 net; half morocco, \$5.25 net. Canadian agent, J. A. Carveth & Co., Limited, Toronto.

This edition has been very thoroughly revised, and much new matter has been added. This text-book may be taken as one of the very best in the English language. It is fully up to date on all points. Everything that is in the least degree antiquated has been rejected. Here the student and practitioner can find what he wishes in reasonable bulk and in trustworthy form. It may be safely recommended as one of the very best books extant on the diseases of women.

INTERNATIONAL CLINICS.

A quarterly of Illustrated Clinical Lectures and especially prepared original Articles on Treatment, Medicine, Surgery, Neurology, Pædiatrics, Obstetrics, Gynæcology, Orthopædics, Pathology, Dermatology, Ophthalmology, Otology, Rhinology, Laryngology, Hygiene, and other Topics of interest to students and practitioners. Edited by W. T. Longcope, M.D., Philadelphia, Vol. III, 18th Series, 1908. J. B. Lippincott Company, Philadelphia. Price, \$2.25.

The contents of this volume are, as usual, excellent. There are three articles on treatment, four on medicine, four on surgery, one on gynæcology, two on pædiatrics, two on orthopædics, two on psychiatry, two on neurology, three on ophthalmology, one on rhinology, and one on pathology. The plates and figures are numerous and good. The subjects treated of are very varied and all of much interest to the medical profession. Among these may be mentioned: Sciatica, whooping cough, tetanus, perforation in thyroid fever, oesophagoscopy, hysteria, malignant disease of the liver, melanotic neoplasms, treatment of fractures by internal splintage, adenoma of typhoid gland, pericolic inflammations, the disinfection of the uterine cavity in puerperal infection, diarrhoeal disorders of infants, chronic milk infection, cleft palate and hare lip, ossifying myositis, general paresis, the sub-conscious state, injuries of the peripheral nerves, functional nervous symptoms,
