## FACTS FOR THE

Dr．McCully；Medical Director of the Medical and Surgical Association of Canada，at the approach of the Neiv Year thanks the People of Toronto and the Dominion for the generous confidence reposed in him as Medical Director．By that confidence and support we have been enabled 10 add new material to our Laboraiory，and our Surgical and Orthoepellical apparatus，all of which has vastly increased our ability to meet and cope with disease and deformity． This year we have treated over one thousand patients，and of that vast array of cases we have not as yet to record cwo per cent．of deaths，while we are able to say that fifty per cent．have either been cured or arc in the course of recovery，and forty per cent． more have so improved under treatment as to be able to enjoy a reasonable amount of healih and strength． Be it remembered that this grand iecord is made up of an army of other doctors ${ }^{5}$ failures，many of whom are men of the highest reputation in Ontario and Toronto as well．
We cured，they failed，we saved lives under them， these people were rapidly sinking into a premature grave．
This work has so rapidly increased，and the volume of business has become so great that our present rooms are too small．Therefore the proprieto－of the Association has purchased a beautiful suit of rooms on the south－east corner of Jarvis and Gerrard，next door north of our present premises，into this place on May ist we will move our business，and with our increased room，new appliances and material will be added to cvery department，so that we shall have the most perlectly equipped office in Canada．Additions to the medical staff will then be made OF TRAIN－ ED MEN FROM THE EUROPEAN COL． LEGES，so as to meet the ever increasing work which called this institution into existence．
During the year nearly gone by we have felt in honor bound to expose the gross ignorance that obtains in the medical profession of this Domimion． In the interests of humall life we have denounced their shortcomings with the hope that thereby they would be forced to pay more attention to their work， more attention to the diagnoses of disease，and exer－ cise greater enre in prescribing．In our possession are prescriptions that were writiten by professurs of Colleges in this city，that if not intercepted by the watciful drugeist must have produced sudden the watchul druggist，must have produced sudden and profession to remember they are in their work either profession to romeng life that their work either savig or destroyng hitle ont we have made some medical men utter terrilic oaths，that we have driven the lance of trup deep no the quivering consciences of others we do not dat ber no has been dealt in malice，no thrust has been made from envy， and all has been done in the interests of the poor sufferer，vainly casting about for hope，health and a prolongation of life．Will the profersor who was in attendance at 44 Camden Strect kindly state his justification for the absurd treatment he adopted in that case．We commence the new year with some important cases．Address

DR．McCULLY，
${ }_{283}$ Jarvis St．，Toronto，Ont．
