

The Canadian Medical Exchange, conducted by Dr. Hamill, Medical Broker, 75 Yonge Street, Toronto, desires to say that at no time of the year are there so many buyers looking for medical practices as now, and would advise those contemplating selling out to list their practices with him at once. He also can give buyers without financial ability a list of villages without a doctor that desire one, and the territory in every case should warrant a practice of from \$2,000 to \$3,000 annually.

ONE COMMON LUNG BACILLUS.—It is quite generally accepted that pulmonary tuberculosis is caused by a bacillus. Coughs, colds, la grippe and bronchitis come and go, even if we cannot exhibit them as entities under the microscope. It would, indeed, be a fortunate thing if there were one common lung bacillus, the destruction of which would remove the cause of all respiratory affections. But under the present condition of things we can only meet indications, treat symptoms and trust to nature. In the treatment of throat and lung affections one remedy of the *materia medica* stands out more prominently than all others. Codeine has the marked peculiarity of controlling coughs and relieving the irritated and inflamed lining of the respiratory tract without arresting secretion. Here it shows its value over morphine. It is not followed by constipation, creates no habit, nor is the mucous membrane of the throat and bronchial tubes made dry. To control the cough and quiet the irritation, at the beginning of an attack, often prevents most serious trouble. There is another remedy which must occur to the mind of every well-posted physician as especially applicable to these conditions. The power of antikamnia to reduce fever and thus control inflammation makes it one of the best preventive and curative agents. The combination of two such clearly defined remedies for respiratory affections is most fortunate. They are prepared in the form of "Antikamnia and Codeine Tablets."

AN UNCONVENTIONAL COUGH SYRUP.—There are "cough syrups" without end. Some of them, it is needless to say, have little or no therapeutic value. Conversely, there are some that no physician need hesitate to prescribe. One of these—Syrup Cocillana Compound (P. D. & Co.)—is so exceptional in many particulars as to be worthy of special mention just now, when coughs are so plentifully in evidence. By its name no one would recognize it as a preparation for "coughs" and "colds," and this, in connection with its general efficiency, constitutes one of its chief claims to distinction. It is a product which the layman knows nothing about. It does not encourage counter-prescription or self-medication. It
