Many Active Liberal Workers all over the Province appointed to office with increases of salaries over old officials.

No regard was had to Civil Service Act, and although the Act was assented to at last Session, it has not yet been brought into force.

The large number of appointments being made indicates that the purpose is to get them through beforehand, although the entire spirit of the Act is being outrageously violated in the meantime; for instance, no promotions being made in the service, but appointments continually made of men who had no previous experience.

Not a single Conservative or Independent appointed since Brewster took office.
