Mr. Sinclair, in moving for a stand-Mr. Sinclair, in moving for a standing committee on fisheries, spoke of importance of fishing industry to Canada, and claimed that we had a practical monopoly of lobster industry of the world, our output realizing about \$3,500,000 a year. As to the whole output of fish there was realized last year over \$26,000,000, there being a considerable increase in the value of the siderable increase in the value of the

business.

W. F. Maclean (South York) asked
if there had not been diminution
of the quantity of fish taken, and Mr. nclair said this was the case, but the value had increased.

In Nova Scotia 25,000 were employors in the deep sea fisheries, while the number in all Canada was 67,646, and with the lobster industry, 88,421. There were 1429 vessels employing 3458 sailors in the deep sea sheries, while the capital invested was nearly \$20,000,000. The average earnings of fishermen in United States was \$519, and in Canada \$388. "From the fishermen we must draw for our future Canadian navy," raid Mr. Sinclair, and it was important that we must hold our grip on fishing board had done much to en-courage the industry in that country. The equipment of the Scotch industry was valued at \$527 per man, while that of the Canadian industry was

but \$191 per man. The efforts of present administra-tion to stimulate industry had produced good results. For instance, the assistance given to cold storage, the propagation of lobsters, the improvement of transportation facilities and subsidies given to coasting steamers employed to collect fresh fish had been appreciated by the fishermen. Mr. Sinclair also suggested that the proposed committee include matters pertaining to marine.

R. L. Borden spoke of the need of factory. Representation had come to him from the south shore of Nova, Scotia that the administration of these day night Ald. McLaren declined to mere nominal sum. He asked for a declaration of government's policy with regard to this. The leader of the opposition regarded the question of the conservation of the timber areas of the country as linked with preservation of the water supply, and he asked the motion be amended to include forests and mines. With that exception he was heartily in accord

with the resolution. Mr. Roche (Lib., Halifax) followed, commending the suggestion, while Dr. Daniel (Con., St. John, N. B.) discussed the political aspect of the question. The marine board of trade had taken the position that the fisheries should be put under the control of a non-political board, claiming that industry at present was not free from political

ences." Need Experts on the Spot. Mr. Kennedy (Lib., B.C.) asserted that the return from the fisheries of the Pacific Province was greater than street that from all the other provinces combined. The difficulty, in his opinion, was that they were too far removed from the seat of government, and there ought to be experts on the spot

and he favored a select committee to bring the needs of the fishermen to

the attention of the government. Three petitions for bills of divorce were introduced in the house to-day. Burk's Falls, Ont., for divorce from her husband, Albert E. King of Kennebunk, Maine, The second was the bill known as the Natal Act, passed by the British Columbia Legislature.

Mr. Comstock's testimony, while

new, had been discounted by the known facts of Thaw's appeal to him to assist in closing up the houses where Stanford White was alleged to have maintained elaborately furnished apartments and where young girls bylaw regulating the location of rag were said to have been mistreated. A dozen letters Thaw wrote to Com-stock regarding the matter and giving a detailed description of the Twentyfourth-street house were admitted in evidence and read to the jury. District Attorney Jerome seemed as well pleased as the defence with the let-ters, and later in the day read into the record himself most of Comstock's replies to Thaw. The witness indicated in his testimony that nothing had ever come of the complaints, legal evidence being lacking.
