BEWARE OF TENDER GUMS

Unhealthy soil kills the best of wheat.
Unhealthy gums kill the best of teeth.
To keep the teeth sound keep the gums well. Watch for tender and bleeding gums. This is a symptom of Pyorrhea, which afflicts four out of five people over forty.

over forty.

Pyorrhea menaces the body as well as the teeth. Not only do the gums recede and cause the teeth to decay, loosen and fall out, but the infecting Pyorrhea germs lower the body's vitality and cause many serious ills.

To avoid Pyorrhea, visit your dentist frequently for tooth and gum inspection. And use Forhan's For the Gums.

Forhan's For the Gums will prevent Pyorrhea—or check its progress, if used in time and used consistently. Ordinary dentifrices cannot do this. Forhan's will keep the gums firm and healthy, the teeth white and clean. Start using it today. If gum-shrinkage has set in, use Forhan's according to directions, and consult a dentist immediately for special treatment.

Let Us Face The

Facts

THE great majority of families in Canada cannot have the doctor for every ailment or simple injury on account of the expense, or cannot receive his early help because of the distance, even when their means permit.

Something must be always on hand ready to combat these minor ills and accidents in place of the physician, or until

For nearly three quarters of a century PERRY DAVIS "PAINKILLER" has been a leading household medicine for just these purposes. It is used in nearly every country on the globe by people of every race, requiring the printing of directions in over twenty languages and tongues.

This world wide test of long experience warrants our recommending that you always have with you when travelling, or on hand when at home, a bottle of "Painkiller" ready for use in emergencies and especially for the purposes noted below.

For acute painful stomach and bowel attacks (summer complaint) take a teaspoonful dose of Perry Davis "Painkiller" in a glass of warm water slightly sweetened, following the other fuller directions on the wrapper accompanying

For sprains, bruises, insect bites and stings, apply the "Painkiller" freely by hand or with a bandage.

For Chills resulting from exposure to cold or damp, take a teaspoonful dose of "Painkiller" in a glass of warm water or milk, slightly sweetened, just before retiring. This treatment with the other measures given on the directions accompanying each bottle will be found most effective in warding off Colds, Bronchitis, La Grippe and Pneumonia.

If a child at bed time shows evidence of such attacks coming on, wring out a flannel cloth in a cupful of hot water to which a teaspoonful of "Painkiller" has been added, wrap this around the child's throat and place over same another cloth. The warmth and drawing power of the "Painkiller" are remarkably effective in checking the ailment, soothing and inducing sleep, sparing both mother and child a restless
