ENGLAND AND MEXICO.—The desire expressed by the President of Mexico to renew diplomatic relations with England does not seem to meet with much encouragement in the latter country, where they say that the benefit derived would hardly repay the cost of the mission.

Fears are entertained for the safety of the mission schooner belonging to the South American Missionary Society in London, which had on board the Bishop of the Falklands, Dr. Stirling, and was on its way to Patagonia. No tidings of her have been received for many days.

Frederick William, elector of Hesse Cassel, has formally recognized and consented to the annexation of his territory to Prussia, and renounced his right of property in the revenues of the electorate. In compensation for which the Prussian Government has granted him an annuity of 2,000,000 thalers.

One of Goethe's stories was a neat bit at those dilatory people who are always behind time. Some one said to a person of this class: "I see that you belong to the three-landed people." "Three-landed—that's rather uncommon, isn't it?" "Oh, no, common enough—two hand-like other people—and a 'decie behind hand'."

The following tender initiative was picked up in the "Lancet" sitting-room at a railroad depot: "Dear Chas, do you love me as much as you did at a quarter to twelve last night? Say you do, please, and it will give me spirit to go down and tackle those cold beans left over from yesterday." The Fonda Democrat is responsible for the above paragraph. Probably by next week Mr. Landwick will be prepared to give Charles' answer which will undoubtedly run somewhat in this wise: "Dear Susan, I do. Tackle them beans."

"Heroism is cheap," said a man the other day. "What the world wants is common sense."

Why the Valve Jar is Superior to all Others for Preserving Fruit.

1. Because it is the only one in which the contents can be securely fastened, and cooked while thus fastened, without risk of an explosion.
2. It is the only one that is automatically sealed, therefore, the only Safe-Sealing Jar in the market.
3. It is so simple that no skill is required to use it successfully.
4. It is securely fastened when placed in the kettle, and being immersed, the fragrance of the contents is confined in the Jar, a more perfect vacuum produced and the handling of the hot jars entirely avoided.
5. It is well known that fruit jars which are closed with rapid fastenings burst by fermentation, and the effect is the most and surrounding a well understood by many housekeepers.

The Cover of the Valve Jar being a perfect safety valve makes an explosion impossible, and entirely obviates every difficulty that exists in other fastenings.
