When the Documents are Opened Some Very Wise Men May Seem Foolish.

Meantime All the Phases of an Improbable Campaign are Discussed

Washington, Dec. 7.—The feeling is very pronounced here as to what course the United States government should take in the Venezuelan matter.

It is believed that the first step in the matter will be to endorse the position taken by the state department, direct the President to still insist upon a proper settlement of the dispute and announce firmly that this country will not consent to English occupancy of the disputed territory beyond the point where she can clearly establish her right.

As much as it is a game, but at which impartiality is the result.

San Francisco, Dec. 9.—A Caracas special says that after the council this morning it was decided to positively refuse to accede to any further demands of England and prepare for the defence of national territory against further incursions.

CASE. The facts that are at issue are that the British have refused to accept the demands of the United States. The considerations involved in an open breach with England or anything approaching an open breach are gigantic. The question of the tariff is infinitely of more importance to Great Britain than the ownership of a few gold mines in Venezuela. Above all things, it is thought that England will not by any act of hers aggravate an anti-English feeling in this country or give cause, if the most delicate arts of diplomacy can prevent it, for a war agitation. England dreads unfavorable tariff legislation. A tariff induced by hostility to England growing out of England's encroachment in this hemisphere, which had aroused the resentment of the American people, would send two million Englishmen to bed without their supper. Such material considerations Great Britain never overlooks. The best of reasons lead to the belief that Lord Salisbury does not intend to maintain a stubbornness which would endanger the friendly relations between the two countries. None of the men well-informed in diplomatic matters believe England will resist to the extent the demands of the United States.
