NEW TYPE MIDGET TRACTOR

Conventional Caterpillar Design to Be Used as Substitute for Narrow-Gauge Industrial Railroads.

A small tractor of the conventional caterpillar type which is designed as a substitute for the narrow-gauge industrial railroads operated in connection with large plants, has recently made its appearance, says Popular Science Monthly. It can move material rapidly from one department of a factory to another and pass obstacles, since it does not require roads or tracks for its operation. Furthermore, it does not mar the surface over which it passes, because it lays its own track as it goes along.

For this reason it can be used inside factory buildings. It can pass through doorways of the ordinary size, and when not used in transporting material from one department to another, it can be employed in the shipping room or on the loading platform. It is but 50 inches wide and 52 inches high.

There are any number of other uses to which the industrial tractor may be put. For instance, it can be employed for pulling loaded wagons out of excavations, or it can be used in logging camps, or in lumber yards, mines and shipyards.

Airplane Wrecks Train.

An airplane has often proved itself more than a match for its antagonist in an unequal encounter. A French aviator once penetrated far behind the German lines and chanced upon a heavily laden troop train. The speed of his craft being fully twice that of this unusual antagonist, it gave him an advantage he was quick to use. The airplane flew so low that its machine gun was brought to bear upon the cars, raking them with disastrous results. Still flying very low, the aviator crossed his speed and, on coming abreast of the locomotive, shot both engineer and fireman. Left to itself, the locomotive raced forward uncontrolled, and taking a sharp curve at high speed was wrecked with great loss of life.

## THERE ARE JUST THREE THINGS TO DO!

BUY NOW - PAY MORE - OR GET LESS

Now when we tell you that it's a case of "Buy Now, Pay More or Get Less," it's no ultimatum from us—but a clear statement of facts that no merchant and no individual can dodge. Wholesale manufacturers are unable to show Men's Suits worth buying at all for less than \$30 today, and they say that price is low compared to what they'll have to ask next year. With such prospects ahead it's no wonder that foresighted men are buying one and two extra suits now.
