

aside the doctor's powders and other stuff he had left, and took a dose of your Pills; followed that with Relief. From that I got better, and in two days I went to see my neighbor, which laid, as I did, under the doctor's care. I told her what I had done, so she set aside her medicine and took Dr. Radway's medicine. She is now getting better fast. Another lady was taken with bloody flux; I told her of it; she also quit the doctor and took your Relief, and was better at once.

MRS. SARAH JANE WISEL.

WELLS, MINN., Aug. 24, 1874.

Testimony of a Great Man.

NEW YORK, January 4, 1877.

Dear Sir: Having for several years used your medicines—doubtfully at first, but, after experiencing their efficacy, with full confidence—it is no less a pleasure than a duty to thankfully acknowledge the advantage we have derived from them. The Pills are resorted to as often as occasion requires, and always with the desired effect. The Ready Relief can not be better described than it is by its name. We apply this liniment frequently and freely, almost invariably finding the promised relief.

Truly yours,

THURLOW WEED.

DR. RADWAY.

MEDICAL TESTIMONY.

As an evidence of the high opinion and confidence the Medical Faculty in the United States entertain for these remedies, we present the following letter from Prof. Reid:—

DR. LAWRENCE REID,

Seven Years Lecturer on Medical Chemistry in the New York Hospital, and seven years Professor of Chemistry in the New York College of Pharmacy, and for four years in the Medical University of Edinburgh, Scotland.

36 DE KALB AV., BROOKLYN, Nov. 30, 1868.

Dr. Radway & Co., of New York, have submitted to my analysis their three remedies, named "Ready Relief," "Renovating Resolvent," and "Regulating Pills." They have also communicated to me their mode of preparing the same. After a careful examination of these articles, I pronounce them as composed of ingredients of great purity and cost, free from mercury or other dangerous substances, and prepared with skill and care.

Having long known Dr. Radway & Co. as scientific gentlemen of high attainments, I place every confidence in their remedies and statements.

These remedies, in my opinion, stand on different grounds from nostrums which absurdly pretend to cure all diseases with one preparation. They are a well-considered series of remedies, prepared on scientific principles, and having a strong claim to public favor.

From their adaptation to the diseases for which Dr. Radway & Co.'s remedies are recommended, and from their speedy action in giving relief, I consider them as a useful invention and quite a family convenience, superseding in numerous instances the necessity of medical assistance; and, when that is necessary, doing something of a safe nature to relieve the sufferer in the interval.

I have no doubt of the great value of the Relief as a local application to the spine, in those cases of weakness of the body or limbs, or the digestive or other organs, which depend upon the nerves proceeding from the spine for power to perform their functions.

LAWRENCE REID.

Prof. of Chemistry.

Dr. Radway on Stricture.

VERY IMPORTANT.

[From "False and True."]

SIR: We reply to yours of the 3d inst. that we would advise a course of our SARSA-PARILLIAN RESOLVENT, say a tea-spoonful after meals and at bedtime. The Ready Relief should be applied daily, over the region of the kidneys, and our Regulating Pills in doses sufficient to establish regularity of the bowels, without purging. So much for medication. Now you must help the medicines, or you might as well do nothing. 1st, As to diet: Choose that which is unstimulating, but simple and nutritious. Good fresh meats, milk, beef-tea, fresh fish, bread and butter, etc., etc. Avoid stimulants of all kinds, highly seasoned food, tobacco, salt meats or fish, strong coffee, &c, &c, cabbage, pork, etc. Exercise moderate; no horseback riding.

We also direct you to stimulate your skin by frequent hot baths, followed by friction with a coarse towel. Hot hip baths, if general baths are not convenient, will answer,

Old age is more subject to lingering, but youth to acute diseases.
