On the south half of lot 16, concession 4, and the north half of lot 16, concession 6, are ossuaries.

West of these on the lot 16, concession 8, the property of Mr. Conner, there is a village site from which his sons, Herbert and Theophilus have collected a good many specimens all of which they have sent to form part of our collection.

A little to the north, lot 19, on the same concession, is the Beecroft farm, on which are a village site, a pottery and a grave-pit, besides about three hundred single graves.

On lot 21, concession 9, is a village site, and on lot 22, immediately north, an ossuary.

Another village site is on lot 22, concession 5, the farm of Squire Currie, and not far away to the south-west are three ossuaries on the farm of Mr. John Edmonds, lot 21, concession 6.

There has been a village on lot 26, concession 10, on this lot there is also an ossuary.

Other ossuaries exist on lot 24, concession 7; lot 25, concession 8; lot 27, concession 10; lot 29, concession 10; and lot 30, concession 12.

On the farm of Mr. Wm. Anderson, north half of lot 23, concession 9, traces of an old village are visible on the face of, and near the top of a hill sloping towards the west, and at the foot of which runs a small stream known as Darroch's Creek, flowing into the larger Batteaux Creek. At this point Darroch's Creek makes a bend almost semi-circular and nearly encloses a strong spring. Between the base of the hill and the creek the land is low and level. From the extremities of the bend, banks have been thrown up stretching towards the high land. That to the north is now barely discernible, but the one on the south side can be easily traced for a distance of fifty-five yards, inclusive of its windings. In the construction of such earthworks no regularity was observed. When the nature of the ground offered any advantage the line of embankment was adapted to it, but in this case
