PROSPECTUS

THE LITERARY GARLAND, A Monthly Magazine, TO BE DEVOTED TO LITERATURE AND SCIENCE

WHILE so many publications of a political character find a liberal support in public attention and generosity, it scarce will not be deemed presumptuous to hope that one of a purely literary nature may find a corresponding degree of esteem and regard. The editor, in the selection of his articles, and in the choice of his contributors, will be guided by the same principles which have governed him in the selection of his materials. He does not scruple to confess, that the flowers which he has gathered in the literary garden, for a time, he deems, will be principally culled of berries from the gardens of modern prose and poetry, as such only will be selected as can be selected as can be readily assimilated, there is little danger but that they will expand as fully as in their native soil, while, by planting in native hearts the germ of honorable emulation, they may assist in fostering into strength a grove of native flowers as rich and fragrant as the most beautiful of their foreign rivals.

With this view, it is proposed to issue, monthly, a Magazine corresponding to the above title, containing an unusual variety of poetry and prose, of articles and sketches, historical and fictitious, with occasionally a philosophical treatise, which, by blending instruction with amusement, will render the Magazine a fit companion for the study as well as the drawing room, for the latter of which, however, it is of course more particularly designed. The work will consist of forty-eight royal octavo pages, and will be printed on good paper, with beautiful new type, and in as far as it is possible to attain. The price is fixed at three Dollars a year to city subscribers—postage being an additional charge, added to those who favour us with orders from the country. The first number will be issued as soon as a sufficient number of subscribers have been obtained to guarantee a reimbursement of the funds expended in the mechanical part of the undertaking.

No payments will be expected before the appearance of the ninth number, between which period and the publication of the twelfth, it is confidently anticipated that all subscriptions will be cheerfully paid. Should the hope of the publisher of the success of the undertaking be realized, it is intended to enlarge and beautify the work with Music, Engravings, &c., so as to render it unsurpassed by any American publication.

The Magazine will be printed and published by the undersigned, at Montreal, by whom all letters and orders, postage paid, will be attended to with gratitude and punctuality. JOHN LOVELL, Montreal, 18th June, 1838.

MORISON'S UNIVERSAL MEDICINE.

NOTICE. THE subscribers, general Agents for Morison's Pills, have approved WILLIAM WATKINS, sub-Agent for the Upper Town, No. 27, St. John Street.

LEAGE & Co. As one public may be able to form some idea of Morison's Pills by their great consumption, the following calculation was made by Mr. WING, Clerk of the County of York, in a period of six years, (part only of the time that Morison's Pills have been before the public,) the number of stamps delivered for that medicine amounted to three million, nine hundred, and one thousand.

The fact in placing the foregoing before the public is to deduce therefrom the following powerful argument in favour of Mr. Morison's system, and to which the public attention is directed, namely, that it was only by trying an unobscured operative medicine to such an extent, that the truth of the Hygienic system could possibly have been established. It is clear that all the medical men in England, of the world, put together, have not tried a system of vegetable purgation to the extent and in manner prescribed by the Hygiene. Hence, therefore, can they (much less do they) really know any thing about the extent of its properties.
