While in this position he placed the muzzle of the rifle against the animal's neck, fired and the steer fell dead. Seaman's jaw was dislocated and his face and head badly lacerated.

Suffering From Earthquake

Advices received by the Portuguese, consul at Boston regarding the earthquake of April 23rd in the vicinity of Lisbon indicate such suffering among the inhabitants of that region that he decided to day to make an appeal for assistance to the American people. In Lisbon itself there was great property damages according to the despatches received by the consul and the towns of Sonora, Bonaventura and Salvaterra on the south side of the Tagus River opposite Lisbon were entirely destroyed. Forty-six persons are reported to have been killed. Many are missing and scores are injured. The villages are destitute and are living in tents and in the open throughout the country side. Owing to the failure of the crops in that portion of Portugal last year the inhabitants of the places not affected by the earthquake can do little to relieve the sufferings of the homeless.

Passengers Injured.

Spreading rails are supposed to be the cause of an accident on the C. P. R. train on the Gibson Branch near Fredericton N. B. on Friday, whereby two box cars were demolished and several passengers injured. The accident occurred eight miles west of Millville. The passengers were very much shaken up. One lady is thought to have had her shoulder dislocated, and George Burton, a well known commercial man had an ankle badly injured. The train was running no faster than ten miles an hour when the accident happened, or much more serious injury would have been done the passengers. The latter were brought to Fredericton in a box car. All slept highly of the way in which Conductor Charles McGibbon treated them after the accident. One of the destroyed box cars contained household effects in transfer from Caribou, Me., to Loggville.

Twenty Persons Drowned.

Twenty persons are missing—all being drowned when a gasoline launch sank in the Ohio river. Of thirty occupants of the boat only ten escaped. The victims were employees of the Steel Company at Pittsburg Pa. They worked over time and left the works to cross the river in a launch. The launch was intended for not over 20 persons, but all the men crowded in. There was no explosion and no leak. The boat simply sank beneath the weight it had been bearing and went to the bottom. The vortex created took many of the men down with it. Others attempted to swim ashore, but were chilled by the cold water, and became exhausted.
