the roads in the country as very bad, which accounts for the restricted movement of produce, and in consequence the store trade is dull. The mild and rainy weather is also a great drawback, particularly to drygoods and furrier declers. It is said that the Cotton Manufacturers' Association has advanced the price of cottons 10 per cent. The reason for this advance is the increased cost of the raw material, and the general opinion is that it is justifiable on this ground. Stocks on hand are generally reported to be large, however. The grocery trade is quiet with white sugars to lower. Dried fruits are very firm in sympathy with advices from primary markets. The hardware trade is quiet, with only a moderate sorting trade. Prices generally rule steady. Boots and shoes and leather very quiet, Hides are again is and leather very quiet, thides are again is the disturbance of the dis

INDIANS IMPOSED UPON.

The So-Called "Messiah Craze" Spreads

to the Brules.

Chamberlain, S. D., Nov. 20.—Deboze, a Yankton Reservation Indian, was in the city yesterday on his way to the Lower Brule agency. A party of fifteen or twenty teams loaded with his people accompanied him. These Indians are well educated and highly advanced, and it has been thought they would not be led away by the "Messiah craze," but a talk with them brought out the fact that they also believe in the coming of the Indians' Messiah, who will wipe the whites from the face of the earth. They are gradually being worked into a state of extreme excitement by the new craze. Emissaries of the "Messiah" are now working among the Sioux and Lower Brules, notwithstanding the vigilance of the cross-centralization.

Brules, notwithstanding the vigilance of the agency authorities. An effort will be made to capture the disturbers.

CHICAGO, Ill., Nov. 20.—A dispatch from Valentine, Neb., says two traveling men who came east from Rushville declare that who came in Tuesday night with a tale that the anti-Messiah half-breeds and the ghost dancers had a row at the agency. He said 60 men had been killed or wounded, but this is probably the worst sort of exag-geration. The town is full of refugees from but this is probably the worst sort of exag-geration. The town is full of refugees from the Indian country. The entire country is thoroughly aroused and all who can get away are doing so. About 600 soldiers have reached Rushwille. These troops are within about 40 miles of the Indians, and could be used at twelve hours' rectine if necessary against the avaited. notice if necessary against the excited Sioux at the Rosebud agency, where the two whites are leading a ghost dance.

Guilty of False Pretenses.

Harry W. Foster was convicted before Judge Elliot this morning on a charge of obtaining money under false pretenses. Foster, to a number of people between this city and Detroit, stated that he was a merchant doing business in Baltimore and that Governor-General Lord Stanley had notified him that a relation of his had died in England leaving a large estate to be divided equally among all the decendants of the family. He was, he said, engaged in looking the heirs up so that the estate could be wound up. To several

of the persons whom he interviewed he complained of being short of money and secured small allowances until his remittances from Baltimore should arrive. He was arrested here over five months ago, and has been confined in jail ever since. The chief witness examined was Mr. George R. Macpherson, of Sarnia, who was relieved of about \$65 which he paid over as a loan to the prisoner, hoping to get the money back when the estate was divided up. Marshall Frey, of the Baltimore police department, was also examined, and testified that the address given by the prisoner in Baltimore was that of a milliner and that Foster had no interest in the business. Foster was sentenced to four months' imprisonment.

A Fow Additional Opinions.

1. Do you approve of the reduction of the number of wards to three?

2. Do you approve of the selection of aldermen by the whole city instead of by wards?

3. Or do you approve of the statists of the city being conducted by three or more commissioners, as in the case of the management of our waterworks.

School Trustee John Turner—I am in waterworks affairs and general work. I think the commissioners

work. I think the commissioners could be paid a good salary and even then the city would save money.

Mayor Taylor—Yes; I would favor the reduction of the number of wards in the city to three. That would simply be in accordance with the statutes. The number of aldermen at the Council Board is too large.

of aldermen at the Council Board is too large.

A. Neighorn—Certainly; everybody believes the city could best be run by a commission, but what sense is there in instituting a movement for reform when not a single suitable man can be named who would accept a position as commissioner? I do not believe in this system of objecting when those who find fault cannot show how things are to be bettered.

City Engineer Tracy—I would favor a reduction in the number of wards. It was a good thing when they were reduced before and I think it would be the same again. There is too much talk by the citizens about the street expenditures in the different wards. It is far from being the most important item of expenditure, and does not constitute over one-twelfth part of the whole amount.
