### Oxford Gem Gas Range

This range is placed on the market to meet the demand for a moderate priced and thoroughly efficient gas stove. It is made with either two or three top burners, and a large oven, with drop door, which acts as a shelf, on which roasts, cakes, pies, etc., may be drawn out. The oven is a perfect baker and roaster, evenly and quickly heated.

This range, though very compact, is quite big enough to cook a considerable sized dinner, and will do it as well as the most expensive gas range.
