

Stomach Blood and Liver Troubles

Much sickness starts with weak stomach, and consequent poor, impoverished blood. Nervous and pale-people lack good, rich, red blood. Their stomachs need invigorating for, after all, a man can be no stronger than his stomach. A remedy that makes the stomach strong and the liver active, makes rich red blood and overcomes and drives out disease-producing bacteria and cures a whole multitude of diseases.

Get rid of your Stomach Weakness and Liver Laziness by taking a course of Dr. Pierce's Golden Medical Discovery—the great Stomach Restorative, Liver Invigorator and Blood Cleanser.

You can't afford to accept any medicine of unknown composition as a substitute for "Golden Medical Discovery," which is a medicine of known composition, having a complete list of ingredients in plain English on its bottle-wrapper, same being attested as correct under oath. Dr. Pierce's Pleasant Pellets regulate and invigorate Stomach, Liver and Bowels.

LESSONS FROM FRENCHMEN.

Some Methods by Which They Grow Double Our Wheat Yield.

In France wheat farming is always combined with some other branches of agriculture, such as sheep raising or the growing of beets, and often the three go together successfully. In America we are accustomed to think that in order to raise wheat successfully one must plant hundreds of acres and devote his entire time to this crop. The statement that it doesn't pay to raise wheat on the small farms in the east is often heard, but is without foundation. The average wheat crop in the west, on the farms devoted exclusively to that cereal, is about fifteen bushels an acre; in France, where wheat is grown in rotation with other crops, the average is about thirty-five bushels.

The wheat farm that the writer visited comprises a thousand acres and is situated on a level plateau, from which on clear days the spires of Paris may be seen. On the afternoon of the writer's visit the men were all busy planting wheat and gathering beets. The first signs of life to be seen as the visitor approached were two flocks of sheep—about 1,200 in all—feeding on beet tops under the care of two shepherds with their dogs. Beyond the sheep and a bit nearer the buildings were the men loading beets into enormous two wheeled carts, each being drawn by three Percheron stallions driven tandem.

Beyond the harvesters were three sets of two furrow plows working, each drawn by six white oxen.

The plows, which were of the two furrow reversible type, were built with a pair of wheels in front to lighten the draft and with four plows keyed in pairs to two parallel steel beams, which were fastened to the axle of the wheels by a ball and socket joint. Each pair of plows was placed one over the other so that when one was in the furrow the mate was upside down in the air directly over it. At the end of the furrow the plowman by means of a lever turned each beam half round, throwing the plow with moldboard on the right hand side into the air and bringing the left hand moldboard into the furrow. The plowmen were followed by three teams of oxen that harrowed the field, and these were followed by two grain drills. To a stranger it was a novelty to see all these operations taking place at the same time.—Country Gentleman.

Thirty bushels of wheat to the acre on fifty acres will result in as much wheat produced at a much less expenditure of labor and seed as will fifteen bushels per acre on 100 acres. This is the whole argument for intensive methods in farming.

DON'T TRY FOR TOO MUCH.

Give Your Vegetables Room is a Good Gardener's Motto.

Do not be afraid to thin out your plants. They must not be crowded. Probably more garden stuff has been ruined for want of being thinned at the proper time than by any other cause.

However that may be, one of the most puzzling things for the beginner is to find out whether any particular vegetable should be thinned or transplanted, and how far apart the plants should stand afterward.

He will get some help from the catalogues as to the distances, but whether he should transplant or thin is the kind of thing that is not in the book. It requires a good deal of nerve to pull up and destroy the unnecessary seedling—more nerve than the amateur possesses. They say that a person never becomes a good gardener until he steals his nerve to this ruthless sacrifice.

A vegetable must have plenty of room to develop its best size and flavor, and one can take no pride in small or commonplace vegetables. True it is that "the worst weed in corn is corn."—Farm Progress.

"TIS WELL TO KNOW A GOOD THING," said Mrs. Surface to Mrs. Know-well, when they met in the street. "Why, where have you been for a week back?" "Oh, just down to the store for a bot of 'Dr. Thomas' Electric Oil' and Mrs. Surface, who hates puns, walked on. But she remembered, and when she contracted a weak back there was another customer for Electric Oil."

Albert Cudick, of Sombra, has been in the Sarnia hospital for some time and has been operated on four times. He still keeps bright and hopeful but he soon will be well.

Mushroom gatherers near Tilbury are making barrels of money this fall by shipping the toothsome fungi to the large cities. The farmers are getting wise to the profits made in the business.

The superiority of Mother Graves' Worm Exterminator is shown by its good effects on the children. Purchase a bottle and give it a trial.

Irrigating With Tomato Cans.

The following is an easy and effective way to start plants in dry weather:

Sink an ordinary tomato can, with a one-eighth inch hole half an inch from the bottom, in the ground so that the hole will be near the roots of the plant. Tamp the dirt around both plant and can and fill the latter with water. Keep the can filled until the plant is out of danger.—Popular Mechanics.

IRRIGATING WITH TOMATO CANS. Keep the can filled until the plant is out of danger.—Popular Mechanics.

Drying Up Wet Places.

Farmers often have a wet, springy place, containing several square feet, in a field which is difficult and often very expensive to drain. The problem was finally solved by a farm hand who dug deep holes in the center of such places and in each one sank two brine barrels, one on top of the other. The top barrel was covered. The water collected almost at once in these barrels, and the wet places dried up.—Farm Journal.

Two things for the farmer to do this fall—vote right and save the seed corn right, but save the seed corn first.

Mark Twain's Profanity.

William Dean Howells read the "Tom Sawyer" manuscript and thought it the best story he had ever read. Clemens consulted him regarding the use of a certain vigorous expletive. Howells advised that it be cut out. Clemens wrote back:

Mrs. Clemens received the mail this morning, and the next minute she lit into the study with danger in her eyes and this demand on her tongue: "Where is the profanity Mr. Howells speaks of?" Then I had to miserably confess that I had left it out when reading the MS. to her. Nothing but almost inspired lying got me out of this scrape with my scalp. Does your wife give you rats like that when you go a little one-sided?—Harper's.

Odorless.

"Now, children," said the teacher, "who can tell me what the word 'odorless' means?"

Willie Jones was sure he knew. "Well, Willie, what does it mean?"

"Odorless means without a scent," he piped.

"Right. Now who can give a sentence using the word correctly?" continued the teacher. "You may answer, Jimmie."

"Please, ma'am, when you are odorless you cannot ride in the trolley cars."—Youth's Companion.

Ability doth hit the mark where presumption overshooteth and diffidence dotheth short.—Cusa.

Your Hair Needs Parisian Sage

Use it as a Dressing—Banish Dandruff—Stop Falling Hair and Scalp Itch.

PARISIAN Sage, the delightful and invigorating hair tonic, is a true hair nourisher. It penetrates into the scalp, gets to the roots of the hair, kills the dandruff germs, and supplies the hair with just the kind of nourishment it needs to make it grow abundantly. Since its introduction into Canada PARISIAN Sage has had an immense sale, and here are the reasons:

It does not contain poisonous sugar of lead, nitrate of silver or sulphur or any injurious ingredient.

It cures dandruff in two weeks, by killing the dandruff germ.

It stops falling hair.

It promptly stops itching of the scalp.

It makes the hair soft, glossy and luxuriant.

It gives life and beauty to the hair.

It is not sticky or greasy.

It is the daintiest perfumed hair tonic made.

It is the best, the most pleasant and invigorating hair dressing made. Made only in Canada by The R. T. Booth Co., Ltd., Fort Erie, Ont. The price is only 50 cents at drug stores and counters where toilet goods are sold.

When Simpkins read in the newspaper about the cricket club, he confessed that he didn't know that the cricket carried a club.

Dr. Morse's Indian Root Pills

are just the right medicine for the children. When they are constipated—when their kidneys are out of order—when over-indulgence in some favorite food gives them indigestion—Dr. Morse's Indian Root Pills will quickly and surely put them right. Purely vegetable, they neither sicken, weaken or gripe, like harsh purgatives. Guard your children's health by always keeping a box of Dr. Morse's Indian Root Pills in the house. They will
