SUMMER BEAUTY DON'TS.

Don't let a permanent frown settle upon your brows through going out into the blazing sun without a sunshade. Try to cultivate pleasant thoughts also. It makes all the difference to

the expression of your face. Don't wear a veil that is worn and dirty. You cannot keep the skin of your face clean if you do. Don't forget that plenty of fruit and green vegetables will

help to keep you fit.

Don't go out without gloves if

your hands are liable to freckle and sunburn. Don't wear short sleeves if

your arms get easily scorched. Don't forget that sunshine is very good for the hair and make a point of sitting in your garden without a hat whenever you can.

Beautiful Nursery Furniture. Wedgwood wicker furniture is beau-tiful for the somewhat elaborately furnished nursery. The woman who thinks that simplicity, even to the point of plainness, should be the keydoubtless think Wedgwood furniture

too elaborate, too ornate. Made of wicker, it is enameled a dull, lovely shade of blue and decorat-ed with festoons of plaster flowers in white, held in loops here and there with little plaster figures. Sleeping baskets, clothes holders of various sorts, children's chairs, tables and chiffoniers are decked with little plaster figures.

VEGETABLE H. H.

Each vegetable must be cut up separately, then all be mixed,

When the hash is mixed bake it in a large pan, in small molds or in the frying pan over slow heat.

Any combination of cooked vegetables desired may be used in making vegetable hash. The vegetables can be used alone or combined with meat.

The hash must be well seasoned with salt and pepper, and if liked there may be added a little minced onions, chives, parsley, chervil or green pepper, finely mixed. The hash must be moistened a little with meat broth, milk or water.

The conditions essential to a good hash are that the vegetables shall be cut fairly fine, but not so fine that the pieces shall lose their shape or stick Aftrice is he armed that hath his pieces shall lose their suapportant quarrel just," and in bus ine as icur time together—that is, the particles should drop apart when shaken on a fork.

A Sweet Little Girl Is Juliana, Princess of Holland.

DEMOCRATIC LITTLE LADY.

Daughter of Royalty Who Is Taught That She Is but Human-Skilled In Languages - Items of Interest to Small People—Puzzles and Games.

Perhaps in all Europe there is not such another lady of royalty as little Princess Juliana, who, if she lives, will some day be Queen of the Netherlands or Holland as it is more commonly known. Juliana was born April

PRINCESS JULIANA OF HOLLAND.

30, 1909, and is therefore a little past

her fifth year. As most children know,

her mother is queen of Holland and

her father is now Prince of the Neth-

erlands, although before he married

Queen Wilhelmina he was a Duke of

Mecklenburg, a German principality.

If Juliana's mother should die the lit-

tle girl would become the queen, her

father not being an heir to the throne.

Notwithstanding her lofty station Ju-

liana is much like other little folks.

She is well educated for her age, and it

is said she can speak several lan-

guages; also she is a very democratic princess and is fond of playing with

A Great Catch of Birds.

There is a certain Pennsylvania farm-

er who is a lover of birds, yet at the

same time likes to raise a fair propor-

tion of fruit, so last summer he was

greatly troubled when the woodneck-

ers fairly swarmed on his cherry trees,

eating their fill and carrying away

large quantities to their nesting places.

Something must be done to save his

cherries, and, as he could not bring

himself to kill the birds, he invented another method. He noticed that the

woodpeckers never flew among the

limbs until after they had alighted on

the trunk and pecked around for a

short time. So he got a lot of poles that were taller than the cherry trees,

hoisted a pole among the branches of

each tree, rested the butt on the ground and let several feet stick out

above the topmost twigs. The wood-

peckers soon got into the notion of

clinging to the upper ends of the poles before they made a raid on the cher-

ries, and while in that attitude the farmer would run under the tree with

an ax and hit the pole as hard as he

could on the opposite side from which

the bird was clinging. The sudden blow invariably stunned the wood-pecker and made it tumble to the

ground, and before it had a chance to

come to its senses the farmer picked it

up and put it into a basket. In this way he captured four dozen wood-

peckers inside of a fortnight without

killing or even permanently injuring a

single bird. Then, when the cherry

crop had been gathered, he turned

VARIETY IN FOOTWEAR. Many Styles of Shoes Worn by Smart

Women The reason for a greater variety in footwear is that the present styles will not conceal the feet. Consequently the shoe manufacturers are putting upon the market their best. Even when the skirts are not short they are so narrow that the feet must of neces sity be very much in evidence in walk-

The new decree of short skirts for utility wear, and sometimes in the more elaborate dresses, will be an added incentive to the shoe manufacture ers. We are all familiar with the laced tango slipper and the cothurnus, but the seemingly irresistible name of tango has been applied to a most fascinate ing walking boot for mornings.

Pills of Attested Value.—Parmelee's Vegetable Pills are the result of careful study of the properties of certain roots and herbs, and the action of such as sed-atives and laxatives on the digestive apparatus. The success the compounders have met with attests the value of their work. These pills have been recognized for many years as the best cleansers of the system that can be got. Their excellence was recognized from the first and they grow more popular daily.

Microbes in Your Scalp Authorities say that a microbe causes baidness. If you are losing hair try our remedy at our risk.

air try our remedy at our risk.

Professor Unna, of Germany, and Dr. Sabouraud, the great French Dermatolrgist, claim that a microbe causes beldness, and their theory has been verified by eminent scientists. This microbe destroys the hair follidels, in time causing the scalp pores to close and the scalp to become shiny. Then, it is believed nothing will revive the growth. If treated before this occurs, baldness may be overcome.

We know of nothing that has given such universal satisfaction in treating the scalp and hair as Rexall "93" Hair Tonic. It has been designed after long study to overcome the cause of falling hair as discovered by Prof. Unna, Dr. Sabouraud and other scalp and hair specialists, and we believe it will do more than anything else can to remove dandruff and stop falling hair; and if any human agency can promote a new growth of hair it will do that, too.

We want you to make us prove it.
