When he returned to his friends and told them the rebuff he had received they were sorry, more about it, and indeed were horrified at McAllister's proposition of signing the pledge.
Indeed, I should hope he would not

sign the pledge, nor you either. Why, he is the very life and soul of our convivial evenings; we could not do without him. Anyhow, we have done our best, so let us say no more about it. He will he leaving town in a month or two to set up for himself, so we must hope for better things," and thus the subject was . dismussed.

After a honeymoon spent in Switzerland, and a visit of a fortnight's duration to his father and mother, Dr. McGorman and his wife had settled down to their new home in Glasgow. Amidst the ex-citement of his final examinations at the hospital, the farewells to his fellowstudents, closely followed by his marriage, and the time spent in Switzerland the demon who ever tracked his footsteps had not been felt nor succumbed to so much as usual, but already a shade might be noticed upon the bright open countenance of the young bride, Already it might be noticed at the few dinner parties to which they were invited among their small but fast increasing circle of friends, that the young wife's eyes rested with an anxious expression upon her husband when the ladies left the room and the gentlemen were left over their wine. The iron had already entered her soul, for such a be etting sin cannot long be concealed from the wife of his bosom by any man.

Patients were to be found in evermereasing numbers by the new doctor, whose reputation for eleverness and skill had preceded him, and it was wellknown that for surgical cases that required a clear head and a steady hand he had carried off the palm at the hospital, and in consequence his practice here was soon all that he could wish, and as much as he could attend Then whispers began to cuculate: " Had So and so noticed how very queer Dr. McGorman looked last night when he was letched to set Brown's leg? "Had Mrs. Jones noticed how strong Dr. McGorman's breath smelt of alcohol when he was leaning over her bed the other morning?" and so gradually the suspicion grew into conviction, and the conviction into certainty, until the people began to go elsewhere when any people began to go eisewhere when any accident or other happened in the evening, "for fear, you know, that Dr. Me. Gorman might not be in a fit state to of the relation between the two giant know what was best to be done." And evils. For instance, of 61,251 men of the grant parallation aged 25-65, 1,000 from avoiding calling him in the evering, they began to avoid him altogether: acquaintances dropped off one by one, many as 1,971 die within the same time, until he felt "that discretion was the OI the 1,000 deaths of the general better part of valour," and that he had better seek some other sphere of labour before he was left without a single patient at all.

For three years he kept the promise be bad made to his dying wife. The struggles he went through during the first part of that time no one but his God will ever know. At the end of the third year he ventured to fetch his little daughter, and for a time all went well.

But one unfucky day one of his London friends, who had been so kind to him, went to see him, and to his eternal shame be it said, offered this man to whom liquor in any shape or form was as the very flames of hell fire, a glass of wine, for old time, you know; 'Should auld acquaintance,' etc. The result was what might have been expected.
