

MEDICAL & SURGICAL ASSOCIATION OF CANADA,

281 and 283 Jarvis Street,

TORONTO.

THIS Association was founded for the treatment of Chronic, Medical and Surgical Diseases and Deformities, and amid the financial shipwrecks everywhere in manufacture and commerce it still lives and pursues the great objects of its founder, THE SAVING AND PROLONGATION of Human life, and the correction and cure of every known deformity. We demand from the Medical fraternity this field for ourselves, for this we have eminently fitted ourselves by study, by the procuring of all the Instruments necessary for this work and all the machinery and appliances for success. So rapid has been the expansion of medicine and surgery that it is impossible for one man to know it all no matter what may be the ability, therefore in the interests of human life we insist that now and forever the field shall be divided and that the divisions shall consist of ACTIVE AND CHRONIC DISEASE.

OUR DEPARTMENTS ARE:

NERVOUS DISEASE, such as paralysis, hysteria, nervous debility and diseases of the brain and spinal cord

MUSCULAR DISEASE, such as muscular spasms, muscular cramps, permanent contraction of any of the muscles or cords of the body, causing lameness and preventing the use of any of the limbs.

RHEUMATISM.—Diseases of the joints, such as are caused by Rheumatism, producing adhesions between the joints and shortening or stopping motion altogether. This we cure. We also operate and give the use of a limb when the joint has become stiff by inflammation and made the patient a helpless cripple, without the use of a crutch. Any crooked limb from disease in the knee joint can now be successfully straightened when the victim can throw away the crutches. Correspondence is solicited.

DISEASES OF THE GLANDS.—Fatty tumors, polypus, tumors and cancers in the breast, ulcerations of the glands, enlarged glands and scrofula in any form.

DISEASES OF THE BONE.—Ulcerations or caries even of the spine, necrosis or death of a bone, softening or soft bone, weak joints, bow legs, club foot and hip joint disease.

DISEASE OF THE SPINAL COLUMN, such as destruction of the bones by softening and ulceration. We also straighten deformities of the back and spinal curvatures, forward or lateral.

DISEASES OF WOMEN.—We cure ulcerations, prolapse, inversion, antversion, retroversion, pain in the back and debility from whatever cause. All communications on this subject should be addressed to the Medical Superintendent and will be strictly confidential.

DISEASES OF YOUTH.—Here we are masters of the field of disease. Ignorance is the most dangerous enemy of man, and ignorance of the laws of one's body may cause thousands yearly to destroy their hopes, their aspirations, and slowly but surely their lives. While thousands more are compelled to shun society and at last land in the lunatic asylum.

RUPTURE.—We cure Rupture without the knife by a new and safe process, and in six months after operation the truss can be thrown away forever.

PILES.—We can cure any form of piles from one day to one week. Reader, if you have any chronic disease of the nose, throat, head, ear, eyes, stomach, lungs, bowels, write and get our opinion.

N.B.—We give all our opinions free. Mention this paper. Address,

S. Edward McCully, M.D.,

MEDICAL DIRECTOR.

281 and 283 Jarvis Street, Toronto.
