38/52 CATARRH.
A New Home Treatment for the Cure of Catarrh, Catarrhal Deafness, and Hay Fever.

The microscope has proved that these diseases are contagious, and that they are due to the presence of living parasites in the lining membrane of the upper air passages and eustachian tubes. The eminent scientists—Tyn dall, Huxley and Beale—endorse this, and these authorities cannot be disputed. The regular method of treating these diseases is to apply an irritant remedy weekly and even daily, thus keeping the delicate membrane in a constant state of irritation, accompanied by violent sneezing, allowing it no chance to heal and as a natural consequence of such treatment not one permanent cure has ever been recorded. It is an absolute fact that these diseases cannot be cured by an application made oftener than once in two weeks, for the membrane must get a chance to heal before any application is repeated. It is now seven years since Mr. Dixon discovered the parasite in catarrh and formulated his new treatment, and since then his remedy has become a household word in every country where the English language is spoken. Cures effected by him seven years ago are cures still, there having been no return of the disease. So high are these remedies valued, and so great is the demand for them, that ignorant imitators have started up everywhere, pretending to destroy a parasite—of which they know nothing—by remedies the results of the application of which they are equally ignorant. Mr. Dixon's remedy is applied only once in two weeks, and from one to three applications effect a permanent cure in the most aggravated cases. N.B.—For catarrhal troubles peculiar to females this remedy is a specific. Mr. Dixon sends a pamphlet describing his new treatment on the receipt of ten cents in stamps. The address is A. H. Dixon & Son, 203 King Street West, Toronto, Canada.—Scientific American.

TRY CAMPBELL'S PAIN-KILLER COMPOUND for constipation or sorefulness.

PAIN-KILLER as a liniment is unequalled for Chilblains, Burns, Bruises, Cuts, Sprains, etc.

UNWHOLESOME TEA.—Tea that stands a long time steeping, or tea that develops tannic acid, and is consequently powerfully astringent and unwholesome.

Mrs. MOSES ABBOTT, 17 Hammonds port, N. Y., was incapacitated for twenty years, became weak as she was unable to sit up and support her case incurable. She was cured by using Wistar's Balsam of Wild Cherry.

BLACK cashmere may be washed in borax water, as, indeed, may navy blue. It should be rubbed only between the hands, not on a board and the water only pressed, not twisted out. Each width folded in four as smoothly as possible, and run through the wringer, then opened and hung up to dry, is the best way. Cashmere so so treated, if it is of good quality, will look like new.

PERFECTLY CREAMING is what the ladies say about "Puff of the Minute" perfume.

CROUP AND THROAT and Lung Troubles are cured successfully with Allen's Lung Balm.

ORANGE CREAM SPONGE CAKE.—One and one-half cups of sugar, two cups of flour, one-half cup cold water, yolks of five eggs and whites of two, the rind and juice of one orange, two teaspoonsful of baking powder. Bake in layers. Whip one cupful of thick cream to a stiff froth, and stir gradually into it half a cupful of powdered sugar; grate into it the yellow of one orange rind. Spread thickly between the layers of cake.

Morsford's Acid Phosphate.
If you are nervous and cannot sleep, try it.

TO REMOVE GREASE SPOTS.—Salt dissolved in alcohol is often found a good thing for removing grease spots from cloth. Molasses will remove the grass stains so often found on the summer clothing of children. Rub the molasses as if it were soap on the stained place, and then wash the garment in the ordinary fashion. For cleaning windows use chamois skin instead of cloth if you wish a bright polished surface.

SOME of the Western politicians collect the seeds of a plant, powder and sift them, and they bake into cakes, which they smelt with oil, margarine, and eat. In preparing the article of food, they use an article known as Imperial Cream Tartar Baking Powder, that is acknowledged to be the best in the world.

POTATO FRITTERS.—To two large cups of boiled, mashed potato, add half a cup of hot milk, three spoonfuls of melted butter, three of sugar, two beaten eggs, one teaspoonful of salt, and a little grated nutmeg. Stir and beat till very light and smooth. Spread on a flat dish, about half an inch deep, and set away to cool; when cold, cut into oblongs, about one inch by four, dip in beaten egg, then in fine cracker-crumbs, and fry in boiling fat, to a rich brown.

DR. CHAS. H. S. DAVIS, Meriden, Conn., says: "I have used it as an accessory in cases of melancholia and nervous debility, and as a pleasant and cooling drink in fevers, and have been very much pleased with it."

WASHING STRAW MATTING.—The best way to wash straw matting is to take half a pailful of hot water, a plate with some dry unsifted Indian meal, and a perfectly clean, long handled mop. The matting should first be swept very clean, so that no dust remains upon it; then scatter the dry meal evenly all over the floor. Dip the mop into the pail of water, wring it so dry that it will not drip at all, and rub one breadth at a time, always lengthwise of the straw, and use clean water for each breadth. Rub it hard, and when the matting dries the meal can easily be brushed off from it. It should always be done on a warm, sunny day, when the windows can be left open and the matting dried quickly.

There is some satisfaction in FARMING

When a farm produces a good living, a happy home and as the times are making us own our own piece of earth in value, it is a good thing to have a good building, a good road, and a good farm. The soil is very rich, but it must be kept at hand, no constructive buildings, yields, but health, fine farming society, and a home and fortune can be had. Address C. W. BARNES, Land Commissioner, Lansing, Mich.
