

APPENDIX.

Appendix I.

The following tables are compiled from the report of the Dominion government for the year 1883, and show the amount and value of the chief exports for that year, the provinces whence these came, and the destination. They are necessarily incomplete, for accurate accounts are not kept. (See under each Province.) It will be seen that some of the articles mentioned might be classed as manufactures.

(N.B.—The statements regarding 1885 were added after the others had been put into type.)
