ARE ACCUSED OF AIDING ENEMY

Belgian Count and Son Are Charged With Supplying Coal—Permission of Premier Given.

(Associated Press Correspondence). Brussels, Oct. 27.—The Belgian government's campaign against Belgian subjects who, during the war, are alleged to have aided the enemy, has just had a sensational turn in the case of the Barons Evence Coppee, father and son, who were probably the wealthiest coal magnates in Belgium.

The two noblemen were arrested some months ago, charged with assisting the Germans during their occupation of Belgium, by turning over coal and by-products to the enemy. Hundreds of other Belgians, accused of similar offences, have been convicted and sentenced to long prison terms.

The sensation in the Coppee case came the other day when the court released them from prison on bail of 1,000,000 francs each on the evidence of Count de Broqueville, who was premier of the Belgian government during its stay at Havre, France, that he had given Baron Coppee permission to work his mines during the German occupation, and ship coal, the idea being that this fuel was to be used for the Belgian population who were forced to remain in the occupied territory.

Count de Broqueville, in an affidavit submitted to the court in the Coppee's behalf, further admitted that he had given the accused permission to sell free-

ly their coal by-products, such as benzol and other things used in explosives to the Germans, as he, in effect, thought that the Germans had so much of these, anyway, that a little more could not do any harm.

During the past few months the Belgian courts have tried dozens of other cases, making short shift of the accused who were proved to have grown rich by trading with the enemy while their compatriots were fighting.

AWAY TO ISLAND TO ESCAPE TAXES

London, Oct. 29.—(A. P. Correspondence)—A party of forty enthusiastic adventurers headed by F. F. Rhodes Disher, fellow of the Royal Geographical Society, have decided to spend the rest of their lives on a tropical island away from excessive taxation. They will leave for the South Seas next month in a schooner yacht, the Medora.

"More than 1,000 people have asked to come with us," said Mr. Disher. "Our first party includes doctors, solicitors, planters, ex-officers, surveyors, engineers, a wireless operator and a clergyman. Several of the party are taking their wives and families with them."

"Until we have secured an island or a portion of one and fitted it up temporarily we shall live in our vessel. One strict rule is that the colony shall have no politics."

SAYS 9,000 IN TORONTO ARE OUT OF WORK

Jobs in Lumber Camps and Mines Available for Some and Farm Demand Brisk.

(Toronto Globe). "There are plenty of jobs out of town," said Rev. F. A. Miller, superintendent of the Provincial Employment Bureau, yesterday.

"The other day we had a request for and immediate supply of 1,500 men by a big lumber concern in Ontario," he said, "and today we could place 2,000 men if they are willing to go out to the woods."

"It is practically certain that at least 9,000 men are at present looking for work in this city," continued Mr. Miller, "but not only the lumber business but also the mines in North Ontario are requiring a lot of help."

Asked as to the demand for agricultural laborers, Mr. Miller said that the demand for them continued brisk. "They are paid \$30 a month and board." That is just 100 per cent. increase since 1914," he said.

"Men willing to go out in the woods receive from \$35 to \$75 and board a month," said Mr. Miller.

Although he admitted the situation looked serious, Mr. Miller said that a number of men coming into the office have just returned from the west and are not at all anxious to start work immediately.

"One fellow came today. He told me he had nearly \$2,000, and just come from the west." He just dropped in to register, but stated that he would probably go north for the winter if he could not get a job that suited him in the city," said Mr. Miller.

"During October there were 1,342 new registrations in the Industrial Department, 1,470 in the Lumber Department, most of whom were referred to jobs," stated Mr. Miller.

"We are trying to avoid relief work next winter," he said, "by trying to get men to accept out-of-town positions. The task of relief would be enormous if the men stayed in the city, for, although we get our regular number of requests for men, the positions open in Toronto are of too varied a nature to send to them the average unskilled worker who comes here," he concluded.

CANNABALISM IN NEW GUINEA IS REPORTED

Brisbane, Australia, Oct. 19.—(A. P. Correspondence)—It is reported from New Guinea that two white men and 10 native carriers are missing and are believed to have been killed and eaten by the natives on the Fly River.

The missing men were hunting birds of paradise in Dutch New Guinea. A searching party reported that on visiting a native village on the Fly River the villagers fled. Some booklets stained with blood, a photograph, some clothes and other evidences of the white men were found.

Lessening the Life Toll

THE value of the lighthouse is especially appreciated by seafaring folks. Many fascinating stories of averted disasters originate from these structures the world over. Their first purpose, however, is preventing the loss of human life. In this they are closely connected with the purpose of Milburn's Heart & Nerve Pills, around which there are also interesting facts of averted disasters.

People to-day are using Milburn's Heart & Nerve Pills as their "Lighthouse" on which to steer a course for good health. There are very few to-day taking an active part in any walk of life who do not require, at some time or another, an additional food for the Heart & Nerve system, for without these properly carrying out their duties every other organ in the body must suffer. The effects of weakened Heart & Nerve centres vary. With some, the heart thumps harshly and irregularly. They feel irritable and are easily excited. Others are afflicted with sleeplessness at night, and drowsy sensations during the day. If you feel unfit in any way you owe it to yourself and friends to try a box of

a young physician practiced widely in a rural district and became famous for his uniform success in the curing of disease. This was Dr. R. V. Pierce, who afterwards established himself in Buffalo, N. Y., and placed one of his prescriptions, which he called his "Golden Medical Discovery," in the drug stores of the United States and Canada so the public could obtain this very remarkable tonic, corrective, and blood-maker. Dr. Pierce manufactured this "Discovery" from roots and barks—corrective remedy, the ingredients of which nature had put in the field and forests, for keeping us healthy. Few folks or families now living have not at sometime or other used this Golden Medical Discovery for the stomach, liver and heart. Evidence of the wonderful sal for the stomach and blood remedy have been sold in this country. No one can fight the battles of life and hold his own if his blood is not pure. No one suffers from colds, "flu" and catarrh who has plenty of red corpuscles and a good digestion. As cell-nutrition depends upon the blood, impurities in the blood, together with a lowered bodily resistance, cause catarrh. Introduce pure red blood into the system, and health is assured.

Dr. Pierce advises you, if you wish to avoid the many germ diseases, to keep your blood in good order. You can obtain Golden Medical Discovery in tablet or liquid form at all drug stores, or send 10c for a trial package to Dr. Pierce's Laboratory in Buffalo, N. Y.

RAATHER SPOILED THE WEDDING OF HUN FOOD MINISTER

Berlin, Oct. 27.—(A. P. Correspondence)—Angry housewives vented their indignation on Herr Hermes, the food minister, while he was being married in a church in Steglitz recently, by jeering and keeping up a running fire of complimentary remarks while the marriage ceremony was in progress. Their comments were directed against the minister's food policy.

The bride was naturally proud of the fact that she was to wed a cabinet minister and took care that the time and place of the wedding should be known to everyone. Notices giving that information were published in the newspapers.

A knot of women had gathered at the church doors and took advantage of the opportunity to tell the minister what they thought of his administration. The Vorwaerts says that Herr Hermes and his bride found the situation so uncomfortable that after the ceremony they left the church by a side door.

Egypt's Waste Basket

Paris, Oct. 28.—(A. P. Correspondence)—Thousands of mummified bodies of the sacred ibis have been found by the French savant, M. Lacau, in the underground necropolis under the famous ruined temple at Dair Medineh, Egypt.

Each bird was in an elaborately decorated vase of earthenware embedded in a sort of cardboard formed by a conglomeration of papyrus which totalled hun-

dreds of thousands of written documents. M. Lacau said the find was one of the most important of the late discoveries in Egyptology. The work of deciphering the documents will take years.

"It is the waste paper basket of ancient Egypt," said one of those charged with the work.

Five Things Happen

When you brush teeth in this way

Dental science has produced a new teeth-cleaning method. Millions of people have already adopted it. Leading dentists everywhere advise it. In effect we say it combats the film on teeth. And it deals with this tooth wrecker as was never done before.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. Very few people have escaped these film-caused troubles. Ordinary methods do not end this film. So millions who brush teeth daily find they still discolor and decay.

The fight on film. Modern dentistry finds that most tooth troubles are caused by film. The film at first is viscous. You can feel it now. But it clings to teeth, enters crevices and stays. It is the film-coat that discolors, not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acids. It holds the acid in contact with the teeth to cause decay.

A multiple attack. Now new ways have been found to fight film. Careful tests have proved them. High dental authorities approve them. They are all combined in a dentifrice called Pepsodent. It meets every modern requirement. And this new tooth paste is fast coming into world-wide use.

You'll know in a week. Some results of Pepsodent appear rapidly. Within one week the good effects will be amazing to you. One ingredient is pepsin. One multiplies the starch digestant in the saliva, to digest starch deposits that cling. One multiplies the alkalinity of the saliva to neutralize mouth acids. Dr. Pierce's Laboratory, Buffalo, N. Y. One of them keeps the teeth so highly polished that film cannot easily cling. In all these ways it brings and maintains whiter, safer teeth. Send the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how the teeth whiten as the film-coat disappears. Compare the results with your old methods. Then let those evident results tell you what is best. Cut out the coupon now.
