Baptism at Kars

Kars, Kings county, Oct. 24.—On Sunday, Oct. 24, the people of Kars and surrounding districts witnessed another baptism, some of the prominent citizens of the parish being among the number of those baptized by Rev. E. A. Allaby. They are:—B. Palmer Wesley, Elliott Vanvort, Hayes Jones, George Clark, Melbourne Jones, William Jones, Eldon Akerley, Carey Coulson and Mrs. Willard Jenkins. Pastor Merritt, Gladys Morrell. In the evening the church was filled to the doors. Pastor Evans welcomed thirty into the

church fellowship. Mr. and Mrs. Israel Sprague, Mrs. Day and Mrs. A. Morrell were received by letter. The remainder of the service was conducted by Evangelist Irvine. The friends of Mrs. Helms will be pleased to know that she is improving in health. Mrs. Herbert Jones, who is under medical treatment, is improving slowly. Lee Sprague returned home on Sunday suffering from an attack of fever. Dr. Frazer is in attendance. George Edgar, senior, has been confined to his bed for some time. The good you do often lasts long enough for the world to forget it. When a woman starts out to reform she ways begins on some man. One kind of an economist is able to make a little work go a long way. Many a man's success leaves a bitter taste in the mouths of his associates.

Fashion Hints for Times Readers

A BLACK AND WHITE COSTUME FOR RESTAURANT DINING

Black and white is the keynote of color in Paris, says an authoritative fashion journal, and it is true that half the frocks being turned out by the great couturiers are in this combination. The restaurant gown illustrated is of white satin, over which is dropped black chiffon embroidered with white, the bodice being of white Irish lace veiled with the chiffon. The tunic merges into a black satin dounce, the joining being made under a vandyke pattern of white lace. At the waist there is a wide sash of black ribbon, with an obi bow at the back and a pale yellow rose—the only bit of color—tucked in at the front.

The Evening Chit-Chat

By RUTH CAMERON

INSTEAD of talking myself, I'm going to let my readers talk to each other today, for a change. You see, it's this way. A few weeks ago I received a letter from a young girl who had written asking me to tell her of some way to overcome her extreme shyness and self-consciousness. Not knowing exactly how to answer her, I published the appeal and asked my readers to help me out. And they have. Most handsomely. Here are some of their very excellent suggestions.

They are especially addressed to the girl of the letter, but I suspect that there are plenty of other girls who can make use of them. "Sensitiveness is selfishness," writes one young woman. "Two years ago I was absolutely the most sensitive and shy person on the face of the earth. I believe. Then I went to a boarding school and lived under the influence of a preceptress, whose life is lived entirely for others. She taught me to realize this truth—that sensitiveness is selfishness—and to cure it by concentrating my mind on some object besides myself. It was hard work, but I finally succeeded, and today people wonder how it was I changed so much in so short a time."

"I was just such a girl as you described," writes another woman. "When I read a short article in the Youth's Companion which made a different person of me. In this article a plain, old country grandmother was hiding her grandson away because he was leaving for a business life in the city. She told him that when he was with folks below himself in the social scale to remember they were folks after all, and should be treated with consideration and kindness. And when with those whom he considered above him, to reflect that they also were only just folks like himself and family, and that there was no real reason why he should be overawed by them. I have not told this so well as the original article, but I hope you catch the idea. Certainly many times when with ladies well versed in ways of society in which I was ignorant, it has given me confidence and ease to remember that they were just folks after all."

A philosophic young woman solved the problem this way: "I was a painfully reserved, bashful, self-conscious girl. You may be sure I was quite all the things your correspondent says she is. To be liked and sought after and to have my name and name blown I found my ideal was wrong. To be liked was not enough. It did not strike the point. The more I pondered over the matter the more I realized that I must reconstruct my ideal, and I finally came to the conclusion that to strive to be liked is not enough. It is in striving to be worthy to be liked that the secret of popularity lies. My viewpoint was now changed completely and in the place of self-consciousness and uneasiness, I found self-reliance and assurance coming. It was no lightning change, remember, but it did come at last."

But, dear me, if I try to tell you the half of the wisdom that has been flowing into my office I shall be reproved for running over my space. So please consider it "continued in our next."

Daily Hints for the Cook

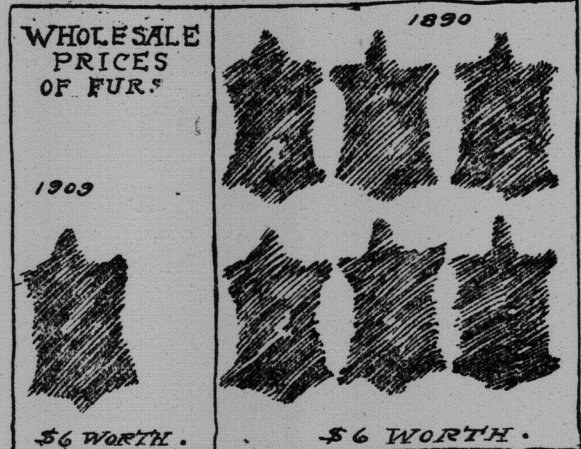

VELVET SPONGE CAKE. Beat the whites of two eggs to a stiff froth. Add the yolks and beat well. Then beat in 1 cup sugar. Sift 1 1/4 cups flour (sift before measuring, then sift again), with 1/2 teaspoonful of soda and salt. Beat this into the eggs and sugar. Last of all, add 1/2 cup boiling water and stir until smooth. Flavor as you like. Bake in 12 cups. This recipe makes very nice jelly roll, baked in a large tin and rolled while warm.

OLD-FASHIONED MOLASSES COOKIES. One cup molasses, 1 cup sugar, 2 1/2 cups butter and lard, 1 cup sour milk, with 2 rounding teaspoons soda. Spices to taste. Do not melt shortening. Mix not too stiff, roll quite thick, sprinkle with sugar and bake in moderate oven.

FIGURES THAT TELL STORIES

THE INCREASINGLY EXPENSIVE FURS

THE increase in the cost of mink skins since 1890 is graphically shown in the illustrations, and the comparison is based upon figures published by the Federal Department of Labor. In 1890, the average wholesale price of a mink skin was 93 cents, and skins were bought that year as low as 80 cents each; in 1909, however, the average price of a mink skin was \$6, and during some parts of the year \$10 was paid for a single skin. This is equivalent to saying that the wholesaler could buy six mink skins in 1890 for the price he has now to pay for one. Although mink has soared in price enormously of late years, other skins have advanced very considerably. For instance, black Canadian skunk skins could be bought for 68 cents a skin in 1890, while last year the price ranged from \$1.25 to \$1.75, the average being \$1.33. Raccoon skins brought 65 cents each in 1891, but last year the average price was \$1.35 per skin. Even muskrat skins, which were sold at 18 cents each in 1890, and as low as 8 cents a skin in 1895, were valued at 27 cents each in 1900. The chart which shows the relative prices of these four furs indicates a practically steady advance since 1896, and the climax was reached in 1907, when the price was over 140 per cent. greater than the average price for the ten-year period from 1890 to 1899. Since 1907 there has been a slight decline, but the price in 1909 is still 125 per cent. greater than in the period mentioned.

JUST ONE DOSE OF DIAPEPSIN MAKES DYSPESIA VANISH

Misery From Indigestion, Heartburn, Gas and Headache Goes Before You Realize It

You can eat anything your stomach craves without fear of indigestion or dyspepsia, or that your food will ferment or sour on your stomach, you will take a little Diapepsin. Your food will be digested, and anything you eat will be digested; nothing can ferment or sour into acid or poison your stomach, which causes Belching, Dizziness, a feeling of fullness after eating, Nausea, Indigestion (life a lump of lead in stomach), Bloating, Heartburn, Water brash, Pain in stomach and intestines or other symptoms. Headaches from indigestion are absolutely unknown where this effective remedy is used. Diapepsin really does all the work of a healthy stomach. Each case of your misadventure in stomach eating a single dose will bring you back to the food you eat and have no more ferment or sour and upset your stomach. Get a large bottle of Diapepsin from your druggist and start taking now, which can be taken with you actually bring about your healthy, strong stomach, for you then can eat anything and everything you want without the slightest discomfort or misery, and every particle of impurity and gas that is in your stomach and intestines is going to be carried away without the use of laxatives or any other assistance. Should you at this moment be suffering from indigestion or any stomach disorder, you get relief within five minutes.

WONDERFUL DISCOVERY IS CLAIMED

(Continued from page 1) It is claimed by some of the enthusiastic scientists who have tested benevolence, that it will mean the ending of the terror which has attended typhoid, cholera, and all germ diseases. How far it may prove successful it is admitted will depend upon careful tests, but so far actual tests upon people in hospitals in various states have brought reports of even greater success than had been expected by Prof. Carel and his co-workers.

Discoverer Talks of It

"I had discussed the success of my work until it has been proved beyond a doubt by medical science," said Prof. Carel, speaking of the new chemical. "As for my own faith in it, I can only say that I am so confident that I am willing to submit myself to cholera infection to prove that it is so successfully treated with my discovery. I firmly believe that if Benetol had been known, and in use in Russia during the last terrible epidemic it would have been arrested. "It may be difficult for the lay mind to realize the great benefits of a powerful germicide which can be taken internally in plain language it means that intestinal infection can be arrested just as effectively by its use as external infection has been in the past by the old agents. As a further illustration in another way, suppose a soldier, parched with thirst after a battle, came upon a pool of stagnant water, in which the deadly typhoid germ was present by millions. He might dip his cup full of water, and by adding one drop of this new chemical, that water would become harmless and would not change from a deadly poison to a beneficial medicated drink."

It is probable that the medical journals will very soon be full of discussions regarding the practicability of the use of the new chemical in thousands of different ways. First tests, it is claimed, will probably be made upon animals for new uses. The first result of the discovery, however, will be to displace, in time, the use of the carbolic acid, which is so generally used for self-destruction. It is even possible that now a more powerful substitute for carbolic acid, has been found, the use of carbolic acid may in time be prohibited by law, and the use of lyso and mercurochrome practically done away with. Moreover, benetol can be produced so cheaply that it can be used among the very poor, as well as the rich.

MORNING LOCALS

Ald. Potts and Superintendent Waring of the ferry service, left on Saturday evening for New York via Boston.

He was gone about a week or ten days looking into the matter of the purchase of a ferry boat for the harbor.

A gospel temperance meeting was held last night in their hall by members of Granite Rock Division, S. of T. E. S. Henegar, president. Rev. V. R. Robinson delivered an able address to a large audience.

Mrs. Jas. McCartney, of 277 Main street, slipped on a banana peel on Saturday night and broke her leg. The accident occurred in Main street. Dr. Roberts attended to her injuries.

In the Clifton House on Saturday the N. B. Life Insurance Underwriters' Association tendered a dinner to George Allan, of Montreal. Mr. Allan spoke interestingly on life insurance work, and thanked the members for their kindness. F. S. Bonnell, president of the New Brunswick body, occupied the chair.

The average man isn't swift enough to have pipe dreams. Hats and shoes are intended to serve the ends of humanity.

ABSCONDER CAPTURED AFTER MONTHS

Bonding Company Finds Him on United States Battleship

Chase of More Than a Year Led To England and Hungary and Back to States—Finally Traced Through Pay Sheets of Navy

New York, Oct. 24.—After a chase leading around the world and lasting more than a year, the Fidelity and Deposit Company of Maryland, has caused the arrest of John Majors, accused of absconding with \$10,000 stolen from a bank in Scranton, Pa.

At the time of the capture Majors was a marine on board the United States battleship Texas in Charleston Harbor. According to the officers of the Fidelity company here, he is said to have appropriated money brought to the Scranton banking house by poor foreigners who wished it sent to their relatives abroad. Majors was manager of the banking house and his departure forced the concern to the wall. The Fidelity company had bonded him for \$5,000. They made this good to the banker, Joseph Reichman, and then spent \$3,800 in running down the fugitive.

He was first chased to England, then to Hungary. In the latter country he married, expecting a \$3,000 dowry, but when the money was not forthcoming he is said to have deserted his bride and made his way to New Zealand. Later he appeared in San Francisco and crossed the continent to New York.

Through secret sources, J. Whitmore Barry, of the Fidelity company, learned that Majors was receiving a salary of just \$20 a month. He figured that the man must be in a government job, and forthwith set about examining the civil service lists and all government papers giving the signatures of employees. He found Majors' signature in the enlistment papers of the navy, and he was quickly traced to the battleship Texas.

FOR AGED PEOPLE

Old Folks Should Be Careful in Their Selection of Regulative Medicine

I have a safe, dependable and altogether ideal remedy that is particularly adapted to the requirements of aged people and persons of weak constitutions who suffer from constipation or other bowel disorders. I am so certain that it will relieve these complaints that I offer it absolutely free to all who will try it. It is called "Stuart's Dyspepsia Tablets." It is a powerful laxative, which can be taken internally in plain language it means that intestinal infection can be arrested just as effectively by its use as external infection has been in the past by the old agents. As a further illustration in another way, suppose a soldier, parched with thirst after a battle, came upon a pool of stagnant water, in which the deadly typhoid germ was present by millions. He might dip his cup full of water, and by adding one drop of this new chemical, that water would become harmless and would not change from a deadly poison to a beneficial medicated drink."

It is probable that the medical journals will very soon be full of discussions regarding the practicability of the use of the new chemical in thousands of different ways. First tests, it is claimed, will probably be made upon animals for new uses. The first result of the discovery, however, will be to displace, in time, the use of the carbolic acid, which is so generally used for self-destruction. It is even possible that now a more powerful substitute for carbolic acid, has been found, the use of carbolic acid may in time be prohibited by law, and the use of lyso and mercurochrome practically done away with. Moreover, benetol can be produced so cheaply that it can be used among the very poor, as well as the rich.

Spokane, Wash., Oct. 24.—Almost immediately after he had sentenced, Alexander David Minor, alias Charles D. Howell, to the penitentiary for life at the State Prison at Havre, Mont., to imprisonment for life at hard labor in the federal penitentiary for robbery, Judge Edward Whitson of the United States district court in Spokane, collapsed from a stroke of paralysis on the right side of the body. The attending physicians say he will recover.

Minor was convicted last September on the charge of robbing a mail car on the Great Northern railway between Bonner's Ferry, Idaho, and Spokane, in April, 1909. The robbery was one of the boldest ever committed in this part of the northwest. Just how much was the amount stolen, Minor is not known, but it is believed to have been more than \$10,000. Minor worked alone.

Carrying a satchel, upon which was used the name of Bennett, a postal inspector, Minor boarded the mail car at Bonner's Ferry. His familiarity with the details of the work took away every suspicion and when the train started the robber drove John Nystrum, a mail clerk, into a locker, where he tied and gagged him. M. Stump, another clerk, was tied to a chair. Minor then rifled the registered mail and escaped as the train pulled into Spokane.

He was arrested in Seattle last spring on the charge of robbing an express office and subsequently confessed robbing the mail car. As the crime was committed before the federal parole law became effective, Minor will remain in prison for life at Leavenworth, Kan., or Atlanta, Ga.

ELEPHANT TRAMPLES KEEPER TO DEATH

First Hurls Him Against Wall and Then Crushes Out His Life

New York, Oct. 24.—Robert Shields, head keeper at Bartlett's animal farm, Marcy and Mallory avenues, Jersey City, was hurled against a wall and then what life was left in him was trampled out by an angry elephant, known as Queen, and weighing four tons, is one of the attractions of Frank Robbins' circus and menagerie, which arrived at Bartlett's farm a week ago for the winter.

The elephant was seemingly docile when put through its exercise by Charles Kirby, the trainer, and was left to rest, tethered by a chain to a heavy iron post. The animal suddenly began tugging at the chain and broke it. Shields called Charles Reed, an assistant, to procure an armful of hay to tempt and soothe the work so the chain could be secured. But the elephant rushed at Shields, and catching him in its trunk, hurled him against a brick wall and then trampled him to death.

A beam board for fine shirts should be very smooth and but thick covered. Some laundresses use a marble board, but these cost quite a sum.

THEY ACTUALLY DO THE WORK

Food Eaten is Worthless Unless Digested—Some Stomachs Must Have Help

Food taken into the stomach, which, from the nature of the food or the condition of the stomach, is not digested, is worse than no food at all. This is a true statement as far as it goes and a great many dyspeptics go only this far with their reasoning. They argue with themselves that because their stomachs do not do the work given them, they must be given less work; in other words, they must be starved. It would be just as sensible for a business man who is unable to do all his own work to cut down his business to his own capacity as it is for a man to starve himself to relieve his stomach. The sensible business man employs help and goes forward with his business. Likewise the sensible dyspeptic will employ help for his stomach and give his body proper nourishment.

Stuart's Dyspepsia Tablets actually do the work assigned to them. They relieve weak and overburdened stomachs of a great portion of digestive action. Their component parts are identical with those of the digestive fluids and secretions of the stomach and they simply take up the grind and carry on the work just the same as a good, strong, healthy stomach would do it.

On this account Stuart's Dyspepsia Tablets are perfectly natural in their action and effects. They do not cause any unnatural or violent disturbance in the stomach or bowels. They themselves digest the food and supply the system with all the nourishment contained in what is eaten and carry out Nature's plan for the sustenance and maintenance of the body.

How much more sensible is this method than that employed by many sufferers from weak stomachs who starve themselves and brain and get the good, nutritious food they need and the man is properly nourished and equipped to carry on his work and perform his duties. He could not possibly be in proper working condition by starving himself or employing some new fangled, insufficient food that does not contain enough nutriment for a year-old baby. A strong man doing strong work must be properly fed and this applies to the brain as well as the body.

Stuart's Dyspepsia Tablets, by relieving the stomach of its work, enable it to recuperate and regain its normal health and strength. Nature repairs the worn and wasted tissues just as she repairs and knits the bone of a broken limb, which is of course not used during the process of repair.

Stuart's Dyspepsia Tablets are for sale by all druggists at 50 cents a box and they are the one article that the druggist does not try to sell something in the place of that's "just as good." Their unqualified merit and success and the universal demand for them has placed them within the reach of everyone.

MORNING NEWS OVER THE WIRES

F. A. Acland, deputy minister of labor, was seriously injured on Saturday night in Toronto. He struck on his head in jumping off a street car and is now in the hospital suffering from concussion of the brain.

Senator Frost, of Smith's Falls, Ont., was taken suddenly ill in Ottawa, on Saturday night, and is in the hospital in a condition is reported somewhat improved. An order in council has been passed at Ottawa, establishing a new station for meats and meat products, including fish. This has to do with adulteration of food products and will become operative in thirty days.

The four year old daughter of Robert Fowler, of Ottawa, was run over by a street car there on Saturday, and her hands severed and both legs broken. She died two hours afterwards.

The private cable laid between Pictou and Wood Islands, P.E.I., for F. B. McCurdy & Co., of Halifax, is completed. Conversation was carried out by the cable between Charlottetown and Pictou and later between Charlottetown and Halifax.

As the result of trouble arising out of the recent sale of the Dunsmuir coal properties to William MacKenzie, of MacKenzie & Mann, James Dunsmuir has brought suit against the former on claims which aggregate in the neighborhood of \$10,000.

William Richards, on trial at Sweetsburg on the charge of having murdered Leonard Dougherty, of St. John, in a drunken brawl, was acquitted there on Saturday. In presenting the report of the Grand Ligne Mission at the Baptist convention of Ontario and Quebec, in Toronto, on Saturday, Rev. E. J. Stolo ridiculed the Eucharistic congress at Montreal, and said that he did not fear a man like Father Vaughan, but rather the man that minimized the differences between the churches.

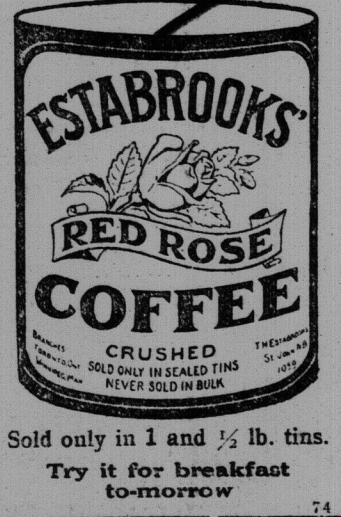

With tears streaming down his face, Myron A. Crippen, father of Dr. Crippen, announced at his home in Los Angeles, California, on Saturday, that he believed his son innocent. He said he believed that Belle Elmore was living some place in the United States.

Truth may be stranger than fiction, but fiction always makes a grand-statement.

Anyway, the owner of an airship may be able to keep up with the cost of living.

The flavor of Estabrooks' Coffee is always the same, because its quality never varies.

If you picked one tin out of a hundred the coffee inside would be the same as the other ninety-nine—rich, fragrant, empty good.

Sold only in 1 and 1/2 lb. tins. Try it for breakfast to-morrow
