

LABOR'S FUNCTION.

The Voice Of Labor

A worker in California has invented a method to magnify sound nearly 5,000,000 times. By this new discovery the ticking of a watch can be made to sound like the boom of cannon. The Human Voice is made to roar like Niagara.

ALL that is necessary is to connect a number of vacuum valves in multiple with a wireless receiving outfit—and lo! you have the voice amplifier.

ONE way to utilize this new discovery to great advantage would be to take the voice of Labor and amplify it billions of times so that it would encircle the globe. This message could be repeated in all tongues, to all workers of the Earth, giving this solution of all the labor troubles in the world to-day:

"CO - OPERATION IS BETTER THAN CONFLICT - EDUCATION RATHER THAN VIOLENT AGITATION. THROUGH RIGHT, NOT MIGHT, LABOR WILL RULE THE WORLD!"
