Sack, Cutaway and Prince Albert, and every method of underhand can-O'Brien yet?) If the same proceeding is gone through with for the male and the two vass possible to unscrupulous politifluids mixed in salt water, fertilization CONTENT. 75 Per Cent. of This Clothing Has Just Been Unwill occur in about ten minutes, and in Mr. Emmerson has been negotiating about an hour the first development of the egg begins. After twenty-four

hours the shells begin to come, and the oysters are in a fair way to grow up.

At the first impregnation, although many male sperms adhere to one egg, it is shown by the microscope that if more than one enters the egg a mon-

strosity results which will not develop.

The greatest difficulty at present is to keep the minute oyster fry from

escaping from the sea water tank in which they are developed, but this prob-

lem is in a fair way of solution, and the day may not be far off when the

oysterman can get his oyster seed in the earliest stages of its development and ready to "set" on the shells plant-
