Now is the Time to Plan for the Summer

We will not give a summer vacation this year as a number of students from long distances would be inconvenienced thereby.

Then, our summers are so deliciously cool that St. John is a harbor of refuge during the hot season, and study just as pleasant as at any other time. Students can therefore enter at any time.

McCormick-The Binder of Satisfactory Service

HERE are some of the things that stand back of McCormick binder service. On a McCormick binder the reel has a wide range of adjustment and handles successfully, tall, short, down or tangled grain. A third packer assists in handling grain that is full of undergrowth or that is very short. The bottoms of the guards are nearly level with bottom of the platform, allowing the platform to be tilted to cut close to the ground without pushing trash ahead of the knives.

The floating elevator on a McCormick binder handles grain in any quantity and does not clog. The cutter bar in built to use either smooth section or servated knives. The improved McCormick knotter does good work without the usual close adjustments.
