

1930 will undoubtedly be a year of Prosperity to the City of London

RESIDENTIAL STREET OVERLOOKING VICTORIA PARK.

The City of London is known far and wide as one of the finest residential cities in the Dominion of Canada. A greater proportion of its citizens own their own homes than in other cities. It invites new residents with confidence of all the advantages it offers.

London is a wonderful manufacturing, wholesale and distributing centre. It is the heart of the finest agricultural district. Its financial institutions are of the best and strongest. Its retail stores are varied and progressive. It's a good city in which to live and work.

The new Canadian National Railways grade plan and the agreement with the London Street Railway bespeak a new era of development that will maintain the city's steady growth.

The building program completed during 1929 has developed both the business and the residential sections most satisfactorily and the outlook for 1930 is all that could be wished for.

*London's Progress is the talk of the people who visit here.
Boost and be proud of London*
