GIRL'S SPORTS

BY MARGIE MacDOUGAL

Skating has begun for girls on Tuesday and Thursday mornings from 10:30-11:30. At the present time half the hour is being spent practicing for figures and the other half is used for free skating. Although nothing is definite at the present time, the girls are going to be putting on a show for the Winter Carnival. The show last year was excellent and very well received by everyone — especially the boys. Any girl who can skate fairly well, (which means being capable of standing without wabbling) and anyone who is really interested is welcome to come over to the rink. It is realized that this is not a very convenient time for practice because of classes but arrangements are being looked into for another time. The girls will definitely have more practices as the Carnival time approaches. There are already about ten girls out, so, if you are interested contact Dianne Lynch.

OTHER SPORTS

The Volleyball players are practicing hard on Tuesdays and Thursdays in the gym from 5:30-6:30. If there is still any hidden talent on the campus, please reveal yourselves. The Tournament will be played at Acadia on November 22.

All girls planning to play basketball are now supposed to be training. Miss Arnold has made up a conditioning program which the girls are carrying out on their own. If anyone wishes to play they must get this program right away from the Athletic office. Basketball practices will be beginning near the end of the month.

Four girls: Karen Jamison, Lois Thare, Sue Lane, and Maida Stewart have been swimming hard these early mornings. The program is slowing down now because of mid-terms as the girls are so tired after swimming they are falling asleep in classes. The girls should be congratulated for their efforts and enthusiasm. An intersquad relay is going to be run off towards the end of the month.

The ground hockey season is over for Dal. An account of the

The ground hockey season is over for Dal. An account of the last game and a summary for the season appear in another column. On talking to Miss Arnold she felt the team did well this year, certainly better than last; she also felt that the scores were not always indicative of the play. Most of the girls were freshettes or sophomores so this year's team will form a strong nucleus for a real contending team in the next couple of years. Congratulations for a good season.

Law Clinches First Place

In interfaculty football this week Law continued its winning ways by downing Commerce 31-0.

The first quarter saw no scoring. In the second however, Lawyers big gun Don MacDougall ran around left end for a TD and a lead that was never to be relin-

quished. Before the half ended John Burns added another major and this was converted by Jim Cowan.

It was Don MacDougall again in the third quarter for the Lawyers this time on the receiving end of a pass for the third TD.

FIELD HOCKEY

On Monday, Nov. 4 the Dalhousie field hockey team was victorious, again beating Kings 2-0. This was Dal's second tory of the season and the university can be very proud of the improvement in its team.

MUDDY FIELD

The game was played on Studley field which was quite muddy, especially in the centre, a fact which added much excitement to the game. Both Dal goals were shot in the first half. Heather MacKinnon scored the first goal for Dal very early in the first period, assisted by Dorothy Woodhouse. From the first goal to the end of the game, the ball was kept well down in the Kings' end of the field and the Dal goalie was not worked nearly as hard as in previous games. The second goal was scored by Wendy Doody

In the second half Kings displayed a burst of energy and managed to pass the ball up the field to the Dal goal several times but they failed to score. Thus when the forty-five minutes had ticked by, the score stood at 2-0 for Dalhousie

when she was passed the ball by Judy Greenwood at the 25 yard

Two other TD's were scored by Lawyers, one on an end run by John Hawco and another on a plunge by Cohen.

The victory clinched first place for the lawyers who now await the winners of the Meds-Engineer game to play for the championship.

DENTS NIP SCIENCE

Brock Rondeau, opened scoring for Dents when he tore around right end from close in. This was the only TD in the first half. Science tied the score in the

Science tied the score in the second half when Pete Stoddard scored on a pass and run play. This set the stage for a dramatic fourth quarter TD by Dents' Gardiner, converted by John Robertson to clinch the victory.

Have you considered the opportunities of a career in sales, actuarial, investment or administration?

If so, the representatives of The Mutual Life of Canada would be most pleased to discuss with you further the rewarding opportunities of an insurance career with The Mutual Life.

Mr. D. E. Weaver, F.L.M.I., Asst. Comptroller
Mr. C. A. Cline, MBA, Personnel Dept.
will be visiting
Dalhousie University

Thursday, November 28th, 9 a.m. - 5 p.m.

CAMPUS CANADA

Canada's National student magazine "Campus Canada" hits the stands on universities across the country this week.

This bilingual magazine, produced by the Canadian Union of Students contains a special report on biculturalism, by Quebec's Minister of resources, Rene Levesque.

A student from the University of Montreal presents a view on the 1962 split of the Canadian University Press and the subsequent formation of the French-Canadian student press union. An analysis of Canada's notional union, RCMP campus activities, "Education" in Britain, black magic and superstition in the Caribean, a novel interpretation of the "Little Orphan Annie" comic strip, round out the English section of the magazine.

An article on the new student force in Quebec, a federation of student association representing almost 50,000 students in classical colleges is included in the French section.

NATIONAL RESEARCH COUNCIL

Ottawa, Halifax, Saskatoon

Summer employment will be available for about 150 graduates and undergraduate students of scholarship calibre during the summer of 1964. Applications are especially invited from students intending to take postgraduate work in the physical and biological sciences, mathematics, engineering, and architecture.

Applications should be submitted by 15 NOVEMBER for fullest consideration.

1964 EMPLOYMENT

Continuing employment is available for recent graduates with Ph.D., Master's, and Bachelor degrees in Aeronautical, Chemical, Electrical, Mechanical Engineering, Engineering Physics, Chemistry, and Physics, etc.

Applications and information are usually available in your Placement Office and your department head's office. If you desire, you may write directly to the Employment Officer, National Research Council, Sussex Drive, Ottawa 2, Ontario.
