

184 332-

Ottawa, 22nd June, 1899-

To the Secretary-

In order to prevent the cutting of Timber in trespass, Mr. Agent McDonald requested that the boundary lines of the Fisher's Grant Reserves, near Pictou, N.S. be retraced.

The Agent estimates the cost of the re-survey may be from \$12.00 to \$15.00. I think that from \$25.00 to \$30.00 should be estimated for this work.

I believe that no expense whatever, in the nature of Surveys, has ever been incurred by this Dept. in connection with the Reserves in question. I have no doubt that the re-survey is very desirable, and would be very useful, in order to enable the Agent to stop the cutting of timber in trespass.

I beg to recommend that the Survey be made as soon as funds are available.

S. Pray

by there will be funds as soon as the supplies for 1899-1900 are available
