

ALPHA

—the engine that takes the work out of farmwork

An Alpha will saw more wood in a day than you can saw by hand in a week.

It will pump water all day long without watching.

It will run your separator, churn or washing machine.

It will run a thresher, feed cutter or silo filler.

There will not be a day when you cannot find some way in which your Alpha will save time, money and labor for you.

Owning an Alpha is cheaper than hiring someone else's engine. The money you now have to pay out for engine hire when you need power, and the greater amount of work you could do if you had an engine of your own would soon pay the cost of an Alpha.

The Alpha is a simple, powerful engine that will give you more reliable service and cause you less trouble than any other engine you can buy.

Ask for catalogue, prices and complete information. Made in eleven sizes, 2 to 28 H. P. Each furnished in stationary, semi-portable and portable style, and with hopper or tank-cooled cylinder.

Continuity

Life Insurance gives continuity to one's life plans. Plans for the home—for the education of children—for business development—may all be destroyed by death—unless safe provision has been made beforehand for such a contingency. For most men the only sure way to so provide is by means of Life Insurance. The Great-West Life Policies are inexpensive, liberal, profitable. Their value is shown by the wide demand for them. For ten successive years The Great-West Life has written the largest Canadian business of all Canadian Companies. Ask for personal rates, stating age.
