

WAS TROUBLED WITH HIS HEART

HAD TO GIVE UP WORK

Mr. Alfred Male, Elloida, Ont., writes: "I was troubled with my heart for two or three years. I thought sometimes that I would die. I went to the doctor, and he said he could not do anything for me. I had to give up work. My wife persuaded me to try Milburn's Heart and Nerve Pills. The first box relieved me, so I kept on until I had taken seven boxes, and they cured me. I would not be without them on any account, as they are worth their weight in gold. I advise my friends and neighbors who are troubled with heart or nerve trouble to try them."

To any of those suffering from heart or nerve trouble we can recommend our Milburn's Heart and Nerve Pills with the greatest confidence.

Price 50 cents per box, or 3 boxes for \$1.25. If your dealer does not have them in stock, send direct to The T. Milburn Co., Limited, Toronto, Ont.

QUESTIONS AND ANSWERS. Miscellaneous.

HENS DIE.

Will you please answer, through your valuable paper, the cause of hens dying from having their galls burst, as we have had several die and would like to know the cause?

W. H.

Ans.—The trouble of gall-bursting in poultry is not known to us. The hens must have had some other trouble.

WART ON HORSE'S NECK.

Have a young horse with a wart on his neck about the size of top of your finger; does not interfere with harness; probably would spoil sale. Can you tell me any way of taking it off without leaving a mark?

SUBSCRIBER.

Ans.—Repeated applications of castor oil have been known to remove warts. Butter of antimony applied with a feather would likely remove it.

MILLET.

1. What distance should the drills be apart for Japanese millet?

2. Could it be cut for silage? If so, at what stage?

3. At what stage should it be cut for hay?

SUBSCRIBER.

Ans.—1. Sow in drills with the ordinary grain drill. It does just as well broadcasted.

2. It would not be likely to make satisfactory silage. Better make hay of it.

3. When the seeds are in the dough stage.

BLIND AND DESTITUTE.

1. We have a blind indigent in our municipality who has a married son and daughter in good circumstances living in a distant municipality. All these are living in the Province of Ontario. Can the council of the township in which the indigent lives compel the son and daughter to provide for their father?

2. Is the municipality obliged to support the indigent?

REEVE.

Ontario.

Ans.—1. We do not think so.

2. It practically comes to that.

BUILDING ON BOUNDARY.

In 1899 a division line was run between two farms; and as some twenty rods of division fence was within a few feet of line it was left standing. In 1908 the property changed hands. I have built on this twenty rods of the surveyed line. Can any objection be taken? The original fence was barbed wire.

Ontario.

Ans.—Hardly—under the circumstances stated, and in view more especially of the length of time that has elapsed since the line was run.

THE SCARLET PIMPERNEL— PLANTING POTATOES.

1. Where could I get the book called "The Scarlet Pimpernel"?

2. Which is the best time to plant potatoes for the best crop, early as you can, or late?

O. D. B.

Ans.—1. The book is published by G. P. Putnam's Sons, New York, U. S. A., from whom it may be obtained. It might be ordered through your local book store.

2. Anywhere from the 24th of May to the 10th of June.

WART ON HEIFER.

I have a valuable yearling heifer which has a large wart or scrofulous lump growing on lower part of side just in front of hind leg. It has not a narrow or constricted neck, so that it could be dissected out with any degree of safety in warm weather. Is there any treatment I could give it to diminish its size, or take it off altogether without the use of the knife?

J. J. M.

Ans.—Very large warts of this kind can be removed only by excision or torsion. The better way is to cast the heifer and secure her firmly with ropes, then with a sharp knife carefully dissect the wart off, removing only those portions of skin to which the warts are directly attached. There will be little bleeding, as there are no large blood vessels in such growths. After the operation, the raw surfaces should be dressed once daily with butter of antimony, applied with a feather, for three or four days, after which they should be dressed twice daily with 1 part carbolic acid to 20 parts sweet oil until healed. If there are any small, flat warts, they can be slowly removed by dressing daily with butter of antimony.

To Stock Breeders

ANNOUNCEMENT OF

EXTRA CASH PRIZES

AT

CANADIAN NATIONAL EXHIBITION, TORONTO, 1912

To every owner of an animal (horses, cattle, sheep or pigs) winning a first prize at the Canadian National Exhibition at Toronto, 1912, that was fed regularly with the original Molassine Meal, made in England, we will give

\$25.00 IN CANADIAN GOLD

as an extra prize. The only condition is that the animal must have been fed regularly from July 1st, 1912, up to the time of the Exhibition on Molassine Meal to the extent of not less than **three** quarts per day.

The only proof we require is a certificate from your dealer stating the amount of Molassine Meal you purchased.

MOLASSINE MEAL

The best feed for Live Stock known to Science

There is hardly a Farmer, Race Horse Trainer, Stock Breeder, Horseman, &c., in the British Isles that does not use Molassine Meal regularly for his stock

MOLASSINE MEAL is a food and replaces other food stuffs. It will keep all animals in good health. Prevents and eradicates worms.

The Original Molassine Meal,
made in England, bears this
Trade Mark on every bag.

HORSES will do more and better work, keep in better health and do not chafe from the harness so much when fed on Molassine Meal. Is equally suitable for heavy draft horses, hunters and race horses, and will bring Show Animals to the pink of condition quicker and better than any ordinary methods of feeding.

MILCH COWS will increase the flow and quality of their milk and make rich flavored butter and cheese, and will prevent any taint in the milk when cows are fed on roots.

STOCKERS can be fattened quicker on Molassine Meal than anything else. It aids and digests their other foods and keeps them free from worms.

PIGS will be ready for the market ten days to three weeks earlier when fed on Molassine Meal than when fed on any other food.

SHEEP AND LAMBS, fed on Molassine Meal, produce the finest mutton and meat obtainable, securing top prices.

POULTRY will fatten quicker and the hens will lay more eggs when fed on Molassine Meal.

MOLASSINE MEAL is put up in 100-lb. bags.

Order from your nearest dealer but be sure and get the genuine. Be sure that the trade mark is on the bag, as above.
