

FARM BOYS

What are Your Plans for the Future?

Do you intend to run your own farm; to use better methods than the average farmer; to raise better crops and better stock; to keep your farm in better condition; TO MAKE THE FARM PAY?

Unless you do, what satisfaction is there in farming? Now is the time to lay the foundation of your life's work; to learn something of soils, fertilizers, drainage, plant and animal diseases, insect pests; varieties of grains, roots and fruits; breeds and types of animals; marketing of farm produce; methods of cultivation; carpentry, blacksmithing, etc.

Get an insight into the innumerable problems that every farmer has to face and should know about.

HOW?

By taking a two-year course at the

ONTARIO AGRICULTURAL COLLEGE

GUELPH ONTARIO

This course is designed to meet the requirements of our country boys.

YOU can come to college for two years

Because---

Ordinary Public School education is sufficient for admission to the course.

The College year begins September 19th and ends April 15th so that boys from the farm may return to their homes to assist in the Spring and Summer work. During this period many boys earn sufficient funds to defray College expenses for the following year.

Tuition fee for Ontario students is only \$20.00 per year, while board and room in residence is obtained at the rate of \$3.50 per week.

A portion of the cost during the first year is defrayed by work on the farm and the various departments of the College.

N.B.—If you wish to continue to the work of the Third and Fourth years for the degree of B. S. A., you are not required to have matriculation standing. Students are accepted for this course if their standing on Second Year examinations warrants it.

COLLEGE OPENS SEPTEMBER 19TH, 1913

HOT WEATHER the Ideal Time to Use a

DE LAVAL CREAM SEPARATOR

THERE is no time when the use of the DE LAVAL Cream Separator is so indispensable to the profitable production of cream or butter as during the hot weather of midsummer.

The use of the separator at this season usually means the difference between a profit and a loss in dairying. It accomplishes a great saving of butter-fat that goes to waste with any other method of separation and enables the production of a higher quality of cream and butter-fat than is otherwise possible.

Moreover, with a DE LAVAL the advantages over other cream separators are greatest at this season, because the separation is more complete and the cream heavier and more even in texture. The machines turn more easily and the capacity is greater, getting the work through more quickly.

If you haven't a separator you can scarcely afford to defer the purchase of a DE LAVAL, or if you have a separator which is not doing satisfactory work, there is no better time to discard it in favor of a DE LAVAL, first trying the machines side by side for your own satisfaction, which every DE LAVAL agent will be glad to give you the opportunity to do.

See the nearest DE LAVAL agent at once, or if you do not know him, write us direct for any desired information.

Give her a chance

A Cow's daily work is to produce milk. If she rests well and breathes pure air—if you make her comfortable—she does more and better work—she gives more and better milk. We had a book printed about this very thing, "The Proper Housing of Cows."
