Gillette Safety Razor

YOUR beard grows its fastest in the summer. Your face is more sensitive. The sun burns your skin; the wind cracks it. Perspiration and dust settle around the roots of the beard.

Then it is that the Gillette is most appreciated. Guarded—adjustable—matchless in its keenness—it shaves smooth, as close as you like, and cool. No pulling or irritation—nothing but grateful comfort, especially for the man whose skin is over-tender or whose beard is over-tough.

If you are sticking close to the job this summer, a Gillette shave every morning will make it easier. If you're taking a vacation trip, a Gillette in your grip will be a friend indeed.

Standard Sets, "Dulldogs" and "Aristocrats" may be had at any hardware, drug or jewelry store for \$2.00. Pocket Editions at \$5 to \$6—Combination Sets at \$6.50 up.

RESULT OF ANTI CONSCRIPTION AGITATION IN QUEBEC

Residence of the Proprietor of the Montreal Star dynamited and is feared this is but the first of a series of outrages to terrorize the community. Threats made on the life of Sir Robert Borden and other members of the Government if conscription law goes into effect.

Montreal, Aug. 9—Considerable of a sensation was created through the city this morning when it became known that an attempt was made last night to blow up the summer residence of Lord Atholstan at Cartierville. Twenty-two windows in the house were shattered by the explosion, the walls were damaged and havoc wrought in the interior of the home. Lord Atholstan, his wife and daughter were in the house at the time but all escaped with a shaking.

up and a scare. The explosion occurred about four o'clock in the morning and could be heard and felt for several miles, many people imagining that an earthquake had shaken the district. Dynamite used is believed to be some of the lot stolen a few days ago from a quarry on the outskirts of the city by a gang of masked men who are still at large.

It is generally feared that this is merely the first of a series of outrages that will be adopted by anti-conscriptionists to terrorize the community.

SUCCESSFUL RAIDS BY THE BRITISH TROOPS

London, Aug. 10—The official communication issued by British headquarters last night reads:

"Artillery activity on both sides continued in the neighborhood of Ypres. There was no infantry action."

"Successful raids took place early in the morning in the morning in the neighborhood of Lens. We secured a few prisoners and killed many Germans. Our troops entered the enemy positions at all points attacked and after destroying the dugouts and wrecking his defences, returned with slight casualties."

"Hostile artillery has been more active than usual in the Nieuport sector. Air work continued yesterday, although bad weather interfered. In air fighting two German airplanes were brought down and another driven down out of control. None of ours missing."

The German Official Report

Berlin, Aug. 9, via London, August 10—The text of the German official statement issued today reads:

"Army of Crown Prince Rupprecht: Unfavorable sighting conditions hindered the development of lively firing activity until the afternoon. It was only during the evening that the artillery duel in Flanders again increased. It remained violent during the night and in some sectors attained the greatest intensity especially on the coast and from Bixchoote to Pollebeke. The infantry did not attack."

"Army of Field Marshal Von Mackensen: The situation is developing favorably. The Russians and Rumanians in execution of mass attacks sent forward forces into fire with the object of wresting from our troops large territorial gains won by them yesterday north of Fokshani. All attacks were repulsed. The enemy suffered heavy sanguinary losses. The numbers of prisoners increased to fifty officers, 3,300 men and the booty to 17 guns and more than 50 machine guns and mine throwers."

Phosphatic Wealth in Pacific

Ocean and Pleasant Islands, situated in the equatorial regions off the northeast coast of Australia, contains masses of phosphatic rock. The former island is 6 miles in circuit and the centre of the island is 265 feet high. Pleasant Island, or as it was named by the Germans Nauru, is still larger, being 12 miles in circumference, but is only 100 feet high. The island of Nauru in the early days of the war was captured by H. M. A. S. Melbourne, and it was then found that the island was defended by a very strong fort and modern guns. The outfit included an almost completed long distance wireless station. The island of Nauru is now being administered by the British High Commissioner in the Pacific, and on account of its extraordinary value and close proximity, it is an object of intense interest on the part of Australians.

A valuation of the deposit was recently made and the value of it, on a very conservative basis, is stated to be at least \$150,000,000. So far the surface has merely been scratched and the immense importance of these phosphatic deposits in regard to the future production of wheat is obvious.

Shipment is hampered very considerably on account of the difficulty of loading. At Ocean Island it is necessary to ship by means of surf boats. At Nauru there is a short cantilever wharf from the shore but this cannot be used in rough weather.

HE WAS HANGED

Frank Little, of Butte, Montana, referred to the United States soldiers as "Uncle Sam's scabs in uniform." An enraged crowd of men took him from his boarding house and hanged him. Here is a lesson for some of the outlaws in Quebec who call themselves Laurier's men.

Rome Has A Sensation

Rome, Aug. 9—The sensation of the day here is the discovery of a secret subterranean passage from the Villa of the Rosas, the residence of Prince Von Baulow the former German ambassador, to the Hotel Eden, the former proprietor of which was a German. It is believed the passage was used to facilitate secret meetings between the diplomat and persons in various walks of life, as well as to ensure secrecy to the Ambassador's guests when the occasion required. An investigation which promises interesting disclosures is under way.

Keep Minard's Liniment in the home.

Berwick Register—Dr. Addison P. Beardsley of Roxbury, Mass., with his son, Master Frederic spent last week in Berwick, the guest of his stepmother, Mrs. S. W. Bligh. They left on Monday for Middleton, where they visit Mrs. C. E. Reigh, Dr. Beardsley's sister, before returning to Roxbury. Dr. Beardsley, as our readers know, is a member of the Massachusetts Legislature. Twenty-six years ago, when a boy in his teens, he was very useful in the office of the Register. He has been doing useful work ever since.

Carload of Cattle Brought Nearly \$9000

Amherst News—Charles T. Logan, Amherst, Point, shipped today a very fine carload of cattle, to Robert McLeod & Co., of Halifax. These cattle were fed by him through the winter and sold at a good figure, after being on the grass for two months. Mr. Logan when asked about prices said that he sold the lot at \$115.00 per head. Some price. We question whether there has been a carload ever shipped from the County that would total as much money.
