# THE GREAT SOUTH AMERICAN

## Stomach Liver Cure

The Most Astonishing Medical Discovery of the Last One Hundred Years. It is Pleasant to the Taste as the Sweetest Nectar. It is Safe and Harmless as the Purest Milk.

This wonderful Nervine Tonic has only recently been introduced to this country by the proprietors and manufacturers of the Great buth American Nervine Tonic, and yet its great value as a curative gent has long been known by a few of the most learned physician no have not brought its merits and value to the knowledge of the

This medicine has completely solved the problem of the cure of ind sestion, dyspepsia, and diseases of the general nervous system. It is of the greatest value in the cure of all forms of failing health from thatever cause. It performs this by the great nervine tonic qualities which it possesses, and by its great curative powers upon the digestive organs, the stomach, the liver and the bowels. No remedy compare with this wonderfully valuable Nervine Tonic as a builder and strength ener of the life forces of the human body, and as a great renewer of oroken-down constitution. It is also of more real permanent value is the treatment and cure of diseases of the lungs than any consumpti camedy ever used on this continent. It is a marvelous cure for ner ousness of females of all ages. Ladies who are approaching the critical period known as change in life, should not fail to use this great Nervin onic, almost constantly, for the space of two or three years. It we earry them safely over the danger. This great strengthener and cur tive is of inestimable value to the aged and infirm, because its gre energizing properties will give them a new hold on life. It will add to or fifteen years to the lives of many of those who will use a half doz

Catarrh of the Lungs, Bronchitis and Chronic Cough. Seuralgia, Pains in the Heart. Liver Complains. ains in the Back, Chronic Diarrhoes, Delicate and Scrofulous Children, Summer Complaint of Infants.

All these and many other complaints cured by this wonderful

### Nervine Tonic. NERVOUS DISEASES.

As a cure for every class of Nervous Diseases, no remedy has been the to compare with the Nervine Tonic, which is very pleasant and narmless in all its effects upon the youngest child or the oldest and most elicate individual. Nine-tenths of all the ailments to which the human amily is heir are dependent on nervous exhaustion and impaired diges When there is an insufficient supply of nerve food in the blood. eneral state of debility of the brain, spinal marrow, and nerves is the esult. Starved nerves, like starved muscles, become strong when the ght kind of food is supplied; and a thousand weaknesses and ailments sappear as the nerves recover. As the nervous system must supply all e power by which the vital forces of the body are carried on; it is the arst to suffer for want of perfect nutrition. Ordinary food does not conain a sufficient quantity of the kind of nutriment necessary to repair the wear our present mode of living and labor imposes upon the nerves. For this reason it becomes necessary that a nerve food be supplied this South American Nervine has been found by analysis to contain the ssential elements out of which nerve tissue is formed. This accounts or its universal adaptability to the cure of all forms of nervous de

Angement.

To the Great South American Medicine Co.:

Dear Genes Genes — I desire to say to you that I zer suffered for many years with a very serious sissase of the stomach and nerves. I tried every efficine I could hear of, but nothing done me y appreciable good until I was advised to y your Great South American Nervine Tonic and Stomach and Liver Cure, and since using everal bottles of it I must say that I am survived at its wonderful powers to cure the stomman and general nervous system. If everyone mew the value of this remedy as I do you would to be able to supply the Gemand.

One descend the formulation of the stared and gaped teforethat raging his featening. Agnesis to the herring—and their personal affinents and characteristics distorted with fear.

What is a difficult it seems for some farmers to get out of old ruts, and yet, if we are going to succeed, we must keep abreast of the times and make good abreast of the times and graph abreast of the times and make good abreast of the times and gape a

he'd low, the eyes watered, salis run from the mouth, soiling the and chin. The animal was dull an without appetite, looked rough and miserable, and showed evident suffering. On examining the mouth a decayed tooth was found, which was tender and painful. It was removed, and soon after the whole expression of the face changed and the horse ate the soft food given with avidity.
Toothache is looked upon as a trifling matter in man, and it has been doubted that animals suffered from it, but it unfits all who suffer with it for a checiful performance of

GUESSING WEIGHT OF STOCK.

Every farmer ought to have a pair f farm scales, not to supersede his own judgment as to the weight of stock, but to test it. If he does not have the sceles the farmer is always at a disadvantage. The butcher and speculative buyer are constantly exercising their judgment in guessing at live weights. It is one of the ways in which this ability to judge correctly is increased. The farmer who weighs his stock frequently can always tell nearly what it is worth "You sick!" asked Jotham Aithough fencing is one of the most to market if he is fattening it. He

having their farms fenced off in small fields. Besides being a waste of land, cross fences often prove a nursery for weeds, and, what is more, they are very expersive to build and keep in repair. If farmers would use portable fences, all the inside fence they would need generally would be a lane through the centre of the farm and enough portable fence for their pasture. It is not to be supposed that this plan would suit all circumstances, but whatever you do, don't keep more fences than are absolutely necessary.

How they did work to put out that there is the seed washed away as the snow melts, for long before that can occur the seed will have settled through the snow would suit all circumstances, but whatever you do, don't keep more fences than are absolutely necessary.

Feeding scrub stock, and feeding the solution of the seed settles below the solution.

When the wind is still and snow lies evenly over the field it is the best possible time to sow clover seed. Any inequalities in seeding can then be easily seen and guarded cgains. There is no danger that the seed washed away as the snow melts, for long before that can occur the seed will have settled through the seed as compared with snow retains in it more of the sun's heat, and if the seed be sown in the morning, with a clear sun shining through the day, not a clover seed can be seen at noon. As the seed settles below the that fire! At last somebody thought of an old road running any kind of stock just enough to somewhere through the woods.

Feeding scrub stock, and feeding noon. As the seed settles below the surface it leaves a hole where it is below the sweep of colds winds, and the seed settles below the sweep of colds winds, and the seed settles below the sweep of colds winds, and the seed settles below the sweep of colds winds, and the seed settles below the sweep of colds winds, and the seed settles below the sweep of colds winds, and the seed settles below the seed settles below the sweep of colds winds, and the seed settles below the seed settle "Git on the old road, everybody, was eful practices, and they are also the sunshine has even greater power
