The unfortunate envoys returned rather crestfallen to Clovis, narrated what had happened, and swore "on their beards" to avenge the affront. In subsequent reigns the beard was the object of numerous enactments, and the fashion of wearing it was changed as frequently. Sometimes it was worn long, sometimes close-dipped, now peaked, now plaited, or even decorated with pearls and gold trinkets.

A flash of lightning is a very large spark of electricity; just the same thing that one sees given by an electric machine in natural philosophy, the only difference being that the best machines will not give a spark more than a yard long, while some flashes of lightning have been estimated to be several miles in length.

Various names have been given to their appearance, though in reality the several kinds are one and the same thing.
